Laboratory Manual of Pharmacology Dr. Remeth J. Dias, Dr. C. R. Patil, Dr. Kuldeep U. Bansod, Dr. Kailas Mali, 2023-09-28

We are very pleased to put forth the revised edition of Laboratory Manual of Pharmacology. We have incorporated all the suggestions, modified it to make it easier, student friendly and relevant in terms of achieving curriculum outcome. We are very much thankful to all the learned teachers who have given their feedback wholeheartedly. We have even incorporated the changes in this manual based on the feedback given by the teachers from all the institutes. Now we believe that the manual has been fulfilling the aspirations of pharmacology teachers and students too. This manual is prepared as per PCI Education Regulations 2020 for Diploma Course in Pharmacy. The methods of all the experiments are reviewed and added from the recent research papers so that the advancement in the methods or apparatus can be addressed. This manual is designed for outcome based education and each experiment is arranged in a uniform way such as practical significance, practical outcomes, PrOs and its mapping with course outcomes, minimum theoretical background, resources used, procedure, precautions, observations, result, conclusion, references and related questions. We have also given the readings for the reference of students and better understanding. Moreover, assessment scheme is also given to help the student and teacher to know what to be assessed. The experiments given are as per the OECD guidelines. Teacher and students have to use suitable software or MSBTE software or any other software to know the demonstration of the experiment. The tables are given to record the observations from the MSBTE software or any other suitable software. In addition, the questions are given at the end of experiments to increase the knowledge of students about the application of statistics which would be helpful for them when they will go for higher studies. Hope this manual will help the students to learn the concept, principles and perform the experiments virtually. We wish you all the best.

Data-Centric Artificial Intelligence for Multidisciplinary Applications
Parikshit N Mahalle, Namrata Nishant Wasatkar, Gitanjali R. Shinde, 2024-06-06

This book explores the need for a data-centric AI approach and its application in the multidisciplinary domain compared to a model-centric approach. It examines the methodologies for data-centric approaches, the use of data-centric approaches in different domains, the need for edge AI and how it differs from cloud-based AI. It discusses the new category of AI technology, data-centric AI (DCAI), which focuses on comprehending, utilizing, and reaching conclusions from data. By adding machine learning and big data analytics tools, data-centric AI modifies this by enabling it to learn from data rather than depending on algorithms. It can therefore make wiser choices and deliver more precise outcomes. Additionally, it has the potential to be significantly more scalable than conventional AI methods. Includes a collection of case studies with experimentation results to adhere to the practical approaches. Examines challenges in dataset generation, synthetic datasets analysis, and prediction algorithms in stochastic ways. Discusses methodologies to achieve accurate results by improving the quality of data. Comprises cases in healthcare and agriculture with implementation and impact of quality data in building AI applications.
