**Peak Revision K.C.P.E. Science , The Education Alibi** Elizabeth Cooper, Erdmute Alber, Wandia Njoya, 2025-10-22 Education is generally promoted as the key to the future of Africa in global development discourses about the continent Education's official story in Africa continues to be one of innocence and public good yet since colonial times education has constituted an area of intense contestation The Education Alibi asks if it is possible that while claiming to be doing one thing education has also been doing another in African communities The concept of the alibi shines an interrogative light on institutions and actors use of education to divert scrutiny from other effects Through ethnographic research and critical analysis across the continent this volume focuses on people's lived experiences to demonstrate how contemporary education systems in fact deepen economic racialized gendered urban rural linguistic religious and other intranational and international inequalities Natural Science Education, Indigenous Knowledge, and Sustainable Development in Rural and Urban Schools in Kenya Darren M. O'Hern, Yoshiko Nozaki, 2014-05-05 Through a multi-sited qualitative study of three Kenyan secondary schools in rural Taita Hills and urban Nairobi the volume explores the ways the dichotomy between Western and indigenous knowledge operates in Kenyan education In particular it examines views on natural sciences expressed by the students teachers the state's curricula documents and schools exam-oriented pedagogical approaches O'Hern and Nozaki question state and local education policies and practices as they relate to natural science subjects such as agriculture biology and geography and their dismissal of indigenous knowledge about environment nature and sustainable development They suggest the need to develop critical postcolonial curriculum policies and practices of science education to overcome knowledge-oriented binaries emphasize sustainable development and address the problems of inequality the center and periphery divide and social cultural and environmental injustices in Kenya and by implication elsewhere In an era of environmental crisis and devastation education that supports sustainability and survival of our planet is needed Within a broader sociopolitical context of post colonialism and globalization this volume points out possibilities and challenges to achieve such an education The authors propose a critical postcolonial approach that acknowledges the contextual and situational production of all knowledge and that de-dichotomizes indigenous from Western scientific knowledge Eric Rico Gutstein Professor Curriculum and Instruction University of Illinois at Chicago USA **The African Book Publishing Record** ,2007 **Kenya National Assembly Official Record (Hansard)** ,2004-06-09 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya *The Kenya Education Directory* ,2003 Working Paper Series ,2003 *Low-fee Private Schooling and Poverty in Developing Countries* Joanna Härmä, 2021-01-14 In *Low fee Private Schooling and Poverty in Developing Countries* Joanna Härmä draws on primary research carried out in sub-Saharan African countries and in India to show how the poor are being failed by both government

and private schools The primary research data and experiences are combined with additional examples from around the world to offer a wide perspective on the issue of marketized education low fee private schooling and government systems H rm offers a pragmatic approach to a divisive issue and an ideologically driven debate and shows how the well intentioned international drive towards education for all is being encouraged and even imposed long before some countries have prepared the teachers and developed the systems needed to implement it successfully Suggesting that governments need to take a much more constructive approach to the issue H rm argues for a greater acceptance of the challenges abandoning ideological positions and a scaling back of ambition in the hope of laying stronger foundations for educational development

C. Schenck,2023-01-15 Refugees and displaced people rarely figure as historical actors and almost never as historical narrators We often assume a person residing in a refugee camp lacking funding training social networks and other material resources that enable the research and writing of academic history cannot be a historian because a historian cannot be a person residing in a refugee camp The Right to Research disrupts this tautology by featuring nine works by refugee and host community researchers from across Africa Europe and the Middle East Identifying the intrinsic challenges of making space for diverse voices within a research framework and infrastructure that is inherently unequal this edited volume offers a critical reflection on what history means who narrates it and what happens when those long excluded from authorship bring their knowledge and perspectives to bear Chapters address topics such as education in Kakuma Refugee Camp the political power of hip hop in Rwanda women migrants to Yemen and the development of photojournalism in Kurdistan Exploring what it means to become a researcher The Right to Research understands historical scholarship as an ongoing conversation one in which we all have a right to participate     *Burning Ambition* Elizabeth Cooper,2022-07-19 Burning Ambition explores how young people learn to understand and influence the workings of power and justice in their society Since 2008 hundreds of secondary schools across Kenya have been targeted with fire by their students Through an in depth study of Kenyan secondary students use of arson Elizabeth Cooper asks why With insightful ethnographic analysis she shows that these young students deploy arson as moral punishment for perceived injustices and arson proves an effective tactic in their politics from below Drawing from years of research and a rich array of sources Cooper accounts for how school fires stoke a national conversation about the limited means for ordinary Kenyans and especially youth to peacefully influence the governance of their own lives Further Cooper argues that Kenyan students actions challenge the existing complacency with the globalized agenda of education for all demonstrating that submissive despondency is not the only possible response to the failed promises of education to transform material and social inequalities     Zoo Charles Chanchori,2018 Visit the zoo to discover

**Reflections on Education in East Africa** Sorobea Nyachieo Bogonko,1992     Incentives to Learn Michael Kremer,Edward Miguel,Rebecca Thornton,2005 We report results from a randomized evaluation of a merit scholarship program for adolescent girls in Kenya Girls who scored well on academic exams had their school fees paid and received a cash grant for school supplies Girls eligible for the scholarship showed significant gains in academic exam scores average gain 0.12 (0.19 standard deviations) and these gains persisted following the competition There is also evidence of positive program externalities on learning boys who were ineligible for the awards also showed sizeable average test gains as did girls with low pretest scores who were unlikely to win Both student and teacher school attendance increased in the program schools We discuss implications both for understanding the nature of educational production functions and for the policy debate surrounding merit scholarships National Bureau of Economic Research web site     *American Economic Journal* ,2009
