

Prowler Utility Trailer Manual

Introduction:

This manual was prepared to acquaint you with the safe operation and maintenance of your Prowler Utility Trailer. We urge you to review this publication carefully. It will help you enjoy safe and trouble-free operation of your trailer.

Note

*When closing the trailer lid, do not attempt to slam the lid closed.
The lid was designed for the gas struts to regulate the rate of closure.
Once the lid is closed, apply slight pressure to the surface until the lock mechanism engages.*

Check the certification label attached to the trailer tongue. It will show the maximum load-carrying capacity of the trailer: 615 lbs. Additionally, it shows the gross vehicle weight rating (GVWR): 1,000 lbs., which is the load carrying capacity plus the weight of the trailer itself.

Warning

The total weight of your trailer and cargo must not exceed the trailer's gross vehicle weight rating.

Weight Distribution

Improper weight distribution can cause a trailer to oscillate from side to side as it moves down the road. This back and forth motion puts excessive strain on both the trailer and the tow vehicle, increasing both gas consumption and the possibility of an accident. This can be avoided by evenly distributing the weight when loading the trailer.

It is extremely important that 5%-10% of the total weight of your loaded trailer should be felt at the coupling ball when the tongue is parallel to the ground. If the weight of the coupling ball does not fall within this range, take immediate corrective action. This can be accomplished by redistributing the load. The importance of an adequate load on the hitch ball cannot be over emphasized.
