For example our popular Jennings UniStar bow is one of the most versatile bows ever built. It can be adjusted from 28" to 33" on one cam, and has a draw length range of up to 20 pounds. And an incredible 10 draw lengths are possible with just one cable change. This high energy bow is a major design breakthrough.

The idea is then turned over to our Cad-Cam Computer System. Henry Gallo uses this computer-aided system to do the final design on the prototype bow for extensive torture and design fail-safe testing.
