**Competition Law in Developing Countries** Thomas K. Cheng, 2020-05-27 This book brings together perspectives of development economics and law to tackle the relationship between competition law enforcement and economic development. It addresses the question of whether and how competition law enforcement helps to promote economic growth and development. This question is highly pertinent for developing countries largely because many developing countries have only adopted competition law in recent years: about thirty jurisdictions had in place a competition law in the early 1980s and there are now more than 130 competition law regimes across the world of which many are developing countries. The book proposes a customized approach to competition law enforcement for developing countries set against the background of the academic and policy debate concerning convergence of competition law. The implicit premise of convergence is that there may exist one or a few correct approaches to competition law enforcement which in most cases emanate from developed jurisdictions that are applicable to all. This book rejects this assumption and argues that developing countries ought to tailor competition law enforcement to their own economic and political circumstances. In particular, it suggests how competition law enforcement can better incorporate development concerns without causing undue dilution of its traditional focus on protecting consumer welfare. It proposes ways in which approaches to competition law enforcement need to be adjusted to reflect the special economic characteristics of developing country economies and the more limited enforcement capacity of developing country competition authorities. Finally, it also addresses the long running debate concerning the desirability and viability of industrial policy for developing countries. The author would like to acknowledge the Research Grants Council of Hong Kong for its generous support. The work in this book was fully supported by a grant from the Research Grants Council of Hong Kong, Project No. HKU 742412H.

**Cartels, Competition and Public Procurement** Stefan Weishaar, 2013-01-01 This volume is long overdue. Integrated legal and economic analysis of competition law is crucial given the nature of the sector. However, to carry this off successfully, one either needs intensive editorial work to bring different teams together or one has to rely on the few who master both economic and legal analysis to a tee. Stefan Weishaar's analysis not only looks at a stubborn issue in competition law. He does so in three jurisdictions in detailed yet clear fashion with clear insight and ditto conclusions. Over and above its relevance to academic analysis, this book can go straight into competition authorities' decision making and therefore also in compliance and remediation advice. Geert Van Calster, University of Leuven, Belgium.

**Cartels, Competition and Public Procurement** uses a law and economics approach to analyse whether competition and public procurement laws in Europe and Asia deal effectively with bid rigging conspiracies. Stefan Weishaar explores the ways in which economic theory can be used to mitigate the adverse effects of bid rigging cartels. The study sheds light on one of the vital issues for achieving cost effective public procurement, which is itself a critical question in the context of the global financial crisis. The book comprehensively examines whether different laws deal effectively with bid rigging and the ways in

which economic theory can be used to mitigate the adverse effects of such cartels The employed industrial economics and auction theory highlights shortcomings of the law in all three jurisdictions the European Union China and Japan and seeks to raise the awareness of policymakers as to when extra precautionary measures against bid rigging conspiracies should be taken Students and researchers who have a keen interest in the relationship between law and economics competition law and public procurement law will find this topical book invaluable Practitioners can see how economic theory can be used to identify situations that lend themselves to bid rigging and policymakers will be informed about the shortcomings of existing legislation from a legal and economics perspective and will be inspired by approaches taken in different jurisdictions

**Economic Law Reforms in the ASEAN Emerging Economies** Terukazu Suruga, Phanhpakit Onphanhdala, Yuka Kaneko, 2023-05-30 This book reviews the periodic changes in the legal policies of the late developing ASEAN countries often known as the CLMV countries Cambodia Laos Myanmar and Vietnam in their continuous path toward globalization after the collapse of the socialist bloc The book also identifies the characteristics of the legal reforms in their present stage guided by the common framework under the ASEAN Economic Community AEC moving toward 2025 The first stage is illustrated by the ASEAN style utilization of foreign investments as reflected in all investment laws and policies of CLMV countries in the 1990s which featured entry control as sticks and investment incentives as carrots Those controls and incentives were the means to induce investors to assume various performance requirements to contribute to industrial policies The second stage witnessed a shift toward enhanced liberalization as an endeavor toward the WTO accession during the 2000s as seen in the integrated investment laws that appealed for the national treatment of foreign investors At the same time those investment laws emphasized the substantive provisions e g fair and equitable treatment and indirect expropriation and procedural protections e g provision of Investor State Dispute Resolution mechanisms as an appeal for stabilization of the investment climate The third stage of legal policy as evidenced by the recent amendments to the investment laws is newly focused on environmental and social considerations which seems to be an indispensable response to the increasing social protests against the negative impacts of investment promotion Simultaneously the means of administrative controls over investors established in the first stage are uniquely utilized for the realization of new goals

**The Rise of the New Network Industries** Juan

Montero, Matthias Finger, 2021-05-04 Cutting through the confusion around the nature and implications of digitalization this book explores the rise of the new digital networks how they affect traditional infrastructure and how they will eventually need to be regulated The authors examine how digitalization affects infrastructures in telecommunications transport and energy and how digital platforms establish themselves as a new network on top of and in addition to traditional ones Complex concepts are introduced through short and colorful stories about the founders of the most popular platforms Google Facebook Skype Uber etc and how they grew to positions of power drawing parallels with century old traditional network industries monopoly power AT T General Electric etc The authors argue that these digital platforms strongly interfere with

traditional infrastructures that are heavily regulated and provide essential services for society meaning that digital platforms should be considered as a new and much more powerful type of infrastructure and will require regulation accordingly A global audience of policy makers public authorities consultants lawyers students and academics as well as anyone with an interest in these digital platforms will find this book enlightening and essential reading *Applied Approaches to Societal Institutions and Economics* Tohru Naito, Woohyung Lee, Yasunori Ouchida, 2017-09-21 This book gives readers the theoretical and empirical methods to analyze applied economics They are institutional economics information economics environmental economics international economics financial economics industrial organization public economics law and economics and spatial economics Because the chapters of this book deal with current topics in these categories they are relevant not only to researchers and graduate students but also to policy makers and entrepreneurs As there is uncertainty about the global economy it is necessary to consider optimal efficient behavior to survive in the confused world The book is organized in three parts Part 1 deals with institutional economics information economics and related topics approached through game theory Part 2 focuses on environmental economics international economics and financial economics through a microeconomic or econometric approach Finally Part 3 concentrates on public economics social security and related fields through microeconomics or macroeconomics
