development study comprising over 1 400 participants over 4 studies The importance of overemployment for individual well being e g burnout job satisfaction as well as for organizational variables e g commitment turnover intention is shown Overemployment is found to be a multidimensional construct consisting of three dimensions length density and distribution of work time The developed theory and scale will allow future researchers to analyze overemployment in more detail The work offers interesting insights for HR and management practitioners when it comes to creating attractive working conditions

Pleasure and Leisure in the Middle Ages and Early Modern Age Albrecht Classen, 2019-08-05 Jan Huizinga and Roger Caillois have already taught us to realize how important games and play have been for pre modern civilization Recent research has begun to acknowledge the fundamental importance of these aspects in cultural religious philosophical and literary terms This volume expands on the traditional approach still very much focused on the materiality of game toys cards dice falcons dolls etc and acknowledges that game constituted also a form of coming to terms with human existence in an unstable and volatile world determined by universal randomness and fortune Whether considering blessings or horse fighting falconry or card games playing with dice or dolls we can gain a much deeper understanding of medieval and early modern society when we consider how people pursued pleasure and how they structured their leisure time The contributions examine a wide gamut of approaches to pleasure considering health issues eroticism tournaments playing music reading and listening drinking alcohol gambling and throwing dice This large issue was also relevant of course in non Christian societies and constitutes a critical concern both for the past and the present because we are all homines ludentes

Michael Ende, 2002 **Time and Petri Nets** Louchka Popova-Zeugmann, 2013-11-05 At first glance the concepts of time and of Petri nets are quite contrary while time determines the occurrences of events in a system classic Petri nets consider their causal relationships and they represent events as concurrent systems But if we take a closer look at how time and causality are intertwined we realize that there are many possible ways in which time and Petri nets interact This book takes a closer look at three time dependent Petri nets Time Petri nets Timed Petri nets and Petri nets with time windows The author first explains classic Petri nets and their fundamental properties Then the pivotal contribution of the book is the introduction of different algorithms that allow us to analyze time dependent Petri nets For Time Petri nets the author presents an algorithm that proves the behavioral equivalence of a net where time is designed once with real and once with natural numbers so we can reduce the state space and consider the integer states exclusively For Timed Petri nets the author introduces two time dependent state equations providing a sufficient condition for the non reachability of states and she also defines a local transformation for converting these nets into Time Petri nets Finally she shows that Petri nets with time windows have the ability to realize every transition sequence fired in the net omitting time restrictions These classes of time dependent Petri nets show that time alone does not change the power of a Petri net in fact time may or may not be used to force firing For Time Petri nets and Timed Petri nets we can say that they are Turing powerful and thus more powerful than classic Petri nets because there is a compulsion to fire at some point in time By contrast Petri nets with time windows have no compulsion to fire their expressiveness power is less than that of Turing machines This book derives from advanced lectures and the text is supported throughout with examples and exercises It is suitable for graduate courses in computer science mathematics engineering and related disciplines and as a reference for researchers *Storytelling, an Act of Liberation* Brigitte Löwe, 2004 An impressive piece of work Storytelling An Act of Liberation combines autobiography and
