It succeeds in showing how microeconomics can be used as a tool for decision making.

Commercial Law Aspects of Residential Mortgage Securitisation in Australia Pelma Rajapakse, Shanuka Senarath, 2019-04-11 This book evaluates key commercial law aspects of the relevant law and legislation governing residential mortgage-backed securities (RMBSs) in Australia from a legal perspective. Within the context of a public benefit test framework, the book seeks to critically evaluate the impact and effectiveness of current law and regulation governing RMBSs. There is a dearth of both academic and practical literature on the legal and regulatory issues surrounding RMBSs in Australia. The book aims to make a contribution to the formulation of law and public policy by suggesting a number of reforms to the current law and practice surrounding RMBSs in Australia. In part, these suggested reforms will be based on the lessons learned from the experiences of overseas jurisdictions such as Canada, the UK, and the United States.

and spectrum sensing and management *Security and Privacy in Digital Rights Management* Tomas Sander, 2003-08-01

The ACM Workshop on Security and Privacy in Digital Rights Management is the first scientific workshop with refereed proceedings devoted solely to this topic. The workshop was held in conjunction with the Eighth ACM Conference on Computer and Communications Security CCS 8 in Philadelphia USA on November 5 2001. Digital Rights Management technology is meant to provide end-to-end solutions for the digital distribution of electronic goods. Sound security and privacy features are among the key requirements for such systems. Fifty papers were submitted to the workshop quite a success for a first time workshop. From these 50 submissions the program committee selected 15 papers for presentation at the workshop. They cover a broad area of relevant techniques including cryptography system architecture and cryptanalysis of existing DRM systems. Three accepted papers are about software tamper resistance an area about which few scientific articles have been published before. Another paper addresses renewability of security measures. Renewability is another important security technique for DRM systems and I hope we will see more publications about this in the future. I am particularly glad that three papers cover economic and legal aspects of digital distribution of electronic goods. Technical security measures do not exist in a vacuum and their effectiveness interacts in a number of ways with the environment for legal enforcement. Deploying security and anti-piracy measures adequately requires furthermore a good understanding of the business models that they are designed to support.
