Microeconomics, Eleventh Edition Mark Rush,2014 The Economics of Gender Equality in the Labour Market Meltem
İnce Yenilmez,Gül Ş. Huyugüzel Kışla,2021-03-07 This book evaluates the global labour market in the context of gender
equality and the associated policies and regulations particularly in developing markets to recommend measures for
encouraging gender equality It exposes the barriers that women employees encounter as well as some of the societal and
workplace policies they specifically are subject to Important themes within this topic include participation rates the looming
gap in hourly pay availability of part time and full time positions value and social status associated with jobs held by men and
women The book examines how global gender policy objectives such as gender equality in careers gender balance in decision
making and gender dimensions in research can be incorporated into policy frameworks The book analyzes the gendered
nature of assumptions processes and theories The juxtaposition between family and work tradition and modernity and
dependency and autonomy clearly still seems to be misunderstood Therefore the book asks whether work improves women s
positions in society and or changes their roles in their families The authors explore and uncover the connections among
employment entrepreneurship migration economics and gender global labour markets and provide helpful solutions to the
perceptions surrounding women s status risks and inequality that limit their economic participation This insightful read
provides comprehensive details on a variety of themes and encourages further research on policies that are key to promoting
gender equality The book will appeal to postgraduate students and researchers of labour and feminist economics the
