Tarbell, Ann Spencer, 1978 Current temperature and pressure measurements from instruments moored in the MODE area during the years 1971-1975 are presented. Record lengths vary from 2 weeks to 7 months. Data from individual instruments are displayed in the form of statistical tables, spectral plots, and variables vs. time plots. Current data are additionally displayed as progressive vector plots. Composite plots of temperature, pressure, or velocity are included for groups of records which could be combined to show a meaningful spatial or temporal array. Selected CTD data are included and displayed as potential temperature and salinity versus pressure. Author Books and Pamphlets, Including Serials and Contributions to Periodicals

Sustainable Logistics Systems Using AI-based Meta-Heuristics

Approaches Jiuping Xu, Mitsuo Gen, Zongmin Li, Youngsu Yun, 2023-12-22 This book introduces and analyses recent trends and studies of sustainable logistics systems using AI-based meta-heuristics approaches, including AI-based meta-heuristics applied to supply chain network models, integrated multi-criteria decision-making approaches for green supply chain management, uncertain supply chain models, etc. It emphasizes both theory and practice, providing methodological and theoretical basis as well as case references for sustainable logistics systems using AI-based meta-heuristics. Most of multinational enterprises today face the challenge of sustainable development for their logistics systems, trying to meet or exceed customer expectations. Sustainable development attracts both researchers and industrial practitioners who are focused on the design and implementation of logistics systems. AI-based meta-heuristics approaches have emerged as a capable method for quickly providing optimal or near-optimal solutions for the problems that exact optimization cannot solve. Recent advances in various AI-based meta-heuristics approaches can resolve various and complex logistics and supply chain problem types. This book mainly encompasses the most popular and frequently employed AI-based meta-heuristics approaches such as genetic algorithm, variable neighborhood search, multi-objective heuristic search, and the hybrid of these approaches. The chapters in this book were originally published in the International Journal of Management Science and Engineering Management.
