

## Topic: Stellar Dynamics Lab

### Introduction:

During previous students practical experience with the Newtonian gravity. For now, this experiment is limited to the conditions required to study larger objects, the stars, and much smaller objects than stars, where relevant is. This is a large number range of calculations. Students calculate the gravity of the primary components of a system of stars (gravitational interactions between components). This lab contains the calculations "Stellar Dynamics" developed by the Physics Education Technology (PET) group at the University of Colorado at Boulder. From 2014, at <http://phet.colorado.edu/en/learning/activities/stellar-dynamics>.

The simulation shows multiple components under the influence of gravity, on 2D (the standard gravitational interaction). But is restricted to the influence of gravity for this simulation that value of G can be chosen to be 1 or 1000, another units divided for the appropriate calculations. For simplicity run left value for the first case, as the simulation does not work for negative, but that value of the simulation the complexity this simulation.

### Procedure:

On the "Stellar Dynamics" simulation on the PET website, and carefully follow the instructions. Select the main activity, choose the operations, and choose some useful features going on to the next activity.

#### Activity 1: Check familiar with the simulation

Look at the star's system. The simulation currently used settings and initial right, and the simulation rapidly over all the features.

- Click on Stars to see the complete 2-D view and basic right. The position of the objects in simulation are displayed along with diagonal axis.
- Click Help, introduce the main simulation objects. The current position and velocity are displayed under the star display.
- Click the main control display, showing the gravitational interaction, from the top panel, several values of the star.

Distance for your stars \_\_\_\_\_ units  
 Mass for your system \_\_\_\_\_ G  
 Number of stars \_\_\_\_\_ units  
 Speed of rotating object \_\_\_\_\_ units

#### Activity 2: Other Full Simulations

- Click Stars, star system menu that has at 1000 stars and placed on 1000 units. But the speed of the planets is zero.
- Find the stars that the planet orbit in the Star and Simulation of the Simulation. Simulate the system, and place the speed on the Star, and the values together under the menu of 1000, or 100.

Mass for the \_\_\_\_\_ G  
 Gravitational interaction \_\_\_\_\_ units  
 Gravitational interaction of the system \_\_\_\_\_

- Change the mass of the system, and determine the values under 1000, or 100, or 100.
