Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

The Emerging Policy for Green Economy and Social Development in Limpopo, South Africa Agnes Musyoki, 2012 This paper evaluates the emerging green economy in South Africa using ideas from the concept of sustainable rural livelihoods, which are intimately connected to ecological services. Many developing countries find that African communities and governments are prioritising green economy for job creation, poverty alleviation, and reducing inequalities while addressing global environmental concerns. What remains problematic, however, is how these objectives are to be achieved. The paper argues that one of the key challenges in South Africa is the gap between policy and implementation of sustainable development, the Millennium Development Goals, and other globally driven initiatives. The paper emphasises that green economy policy needs to consider poverty reduction and women's empowerment in order to promote rural sustainable development.
