Individual preferences and labour market outcomes of women and men in Germany Annika Frings,2019-11-14 Master s Thesis from the year 2018 in the subject Sociology Work Education Organisation grade 1 3 language English abstract  
Objective of this paper is to find answers to the following research questions 1 Do preferences and to what extent lead to variation in labour market success between women and men within the group of women and within the group of men 2 Can preferences explain the remaining of a pay gap between women and men Furthermore it makes the attempt to test the long term effect of preferences and their proclaimed stability over the life course try ing to find answers to the questions 3 If preferences persist over the life course and remain unaffected by labour market factors And 4 If preferences at one timepoint influence the labour market success at the next time point Inequalities in labour market success between women and men have often been topic of analysis in the social sciences attributing differences to various factors like involvement in unpaid work differences in occupation choice job characteristics or responsibility for children A new but controversially discussed approach is the so called preference theory proposed by Catherine Hakim who sees preferences regarding work and family as the mayor determinant of women s employment choices in the 21st century Proceeding from earlier studies this paper aims at enhancing the current state of research in three ways First in contrast to previous research which relied on general attitudes to measure preferences the utilised data set here allows for the usage of items capturing actual prefer ences measured as the importance of work and family for the respondents own life Secondly this study does not only focus on women but also includes men as a target group an ap proach which has been rather neglected in previous research This offers the possibility to not only analyse differing effects of preferences on labour market outcomes within the group of women but tests the same for men and further offers the possibility to compare women and men with one another also with respect to the gender pay gap Thirdly this study focusses on Germany which to my knowledge was not yet object of an in depth analysis regarding Hakim s preference theory and its connection to labour market success      Journal of Soil and Water Conservation ,2017 Vol 25 no 1 contains the society s Lincoln Chapter s Resource conservation glossary      **The Publisher** ,1911      *British Books* ,1911      *The Publishers Weekly* ,1913      *Palmer's Index to "The Times" Newspaper* ,1891 Covers the period from 1790 to 1905 in The Times of London      *English Mechanic and Mirror of Science* ,1871      *The Farmers' Advocate and Home Magazine* ,1914      *Palmer's Index to the Times Newspaper* ,1886      The Guide to Medical Organizations and Agencies ,2000      **The Athenaeum** ,1904
