Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners Cheryll M. Adams, Alicia Cotabish, Debbie Dailey, 2021-09-23 A Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school. It provides an array of examples across the four domains of science: physical sciences, Earth and space sciences, life sciences, and engineering technology and applications of science. Each learning experience indicates the performance expectation addressed and includes a sequence of activities, implementation examples, connections to the CCSS Math and CCSS ELA, and formative assessments. Chapters on specific instructional and management strategies, assessment, and professional development suggestions for implementing the standards within the classroom will be helpful for both teachers and administrators. **Resources in Education**, 1991

Designed to equip teachers and future teachers with tools to create and implement standards-based STEM curriculum and cognitively demanding tasks, author Sherri Cianca offers hands-on, easily implemented strategies that foster student reasoning, autonomy, and humanity. This fresh approach to STEM teaching empowers teachers, preservice and inservice, and other leaders to better understand the standards and better design effective instructional practices. The chapters work together to advance teachers' abilities to achieve mastery-level understanding of content, translate standards into student-friendly curriculum, and create a robust learning environment. Each chapter contains probes to uncover incomplete and inaccurate conceptions and to focus attention on key learning elements. Chapter summaries and Reflect and Apply sections reinforce professional development, and appendices expand on chapter content and provide rich examples of STEM units, curriculum, and assessment criteria. Dr. Cianca's vision is that teachers
