Life Science Paper1 2013 September Grade1:

Sociocultural Perspectives on Youth Ethical Consumerism Giuliano Reis, Michael Mueller, Rachel Gisewhite, Luiz Siveres, Renato Brito, 2017-11-07 This exciting new book advances current practice based and theoretical knowledge around how youth defines and engages with consumerism to provoke a larger conversation within science and environmental education. It is also geared towards unveiling those literacy praxes that can assist youth to adopt more ethically oriented consumerist habits. More specifically, this book studies how youth's participation in the global consumer market intersects with media technologies, new literacies, as well as science and the environment from sociocultural perspectives. In addition, it considers how school science has mediated youth participation in hyper consumerism from food and technology to shelter and transportation. This important and timely book is a must read for those interested in topics such as critical youth studies, critical media literacy, STEM arts based research, STSE education, citizenship education, cultural studies, policy studies, curriculum studies, socio scientific issues, technology sustainability, food studies, social justice, poverty and consumer behaviour. A wide range of science, technology and environmental educators from Australia, Brazil, Canada, Netherlands and the United States have combined their perspectives to produce this exciting, innovative, timely and important book. It should be essential reading for all teachers, teacher educators and curriculum developers keen to address key issues raised by a commitment to assist students in refining their understanding of what constitutes socially, culturally, ethically and politically responsible consumer practices and supporting them in formulating and engaging in effective individual and collective action. Derek Hodson, Emeritus Professor of Science Education, Ontario Institute for Studies in Education (OISE), University of Toronto; Professor of Science Education at The University of Auckland, New Zealand and Founding Editor of the Canadian Journal of Science, Mathematics and Technology Education (CJSMTE). The authors in the book deconstruct and analyse intricate economic, sociopolitical and affective networks that are behind the cycles of production, distribution and consumption of objects that are present in youngsters' daily lives and their attitudes towards them. Apart from breaking new ground by proposing and discussing socioculturally informed research about the topic, the book connects with pedagogical approaches that value critical perspectives on the nature of the relationship between science, technology, society and environment. It is a must read for both researchers and practitioners interested in issues related to sustainability and citizenship education. Isabel Martins, Professor of Science Education, Universidade Federal do Rio de Janeiro, Federal University of Rio de Janeiro (UFRJ).

Sustainability Standards and Global Governance Archana

Negi, Jorge Antonio Pérez-Pineda, Johannes Blankenbach, 2020-07-02 This open access book focuses on the issue of sustainability standards from the perspective of both global governance frameworks and emerging economies It stems from the recognition that the accelerated pace of economic globalization has generated production and consumption patterns that are generating sustainability concerns Sustainability standards and regulations are increasingly being used in a bid to make global consumption and production more sustainable Given the dense inter connectedness of economic affairs globally the use of sustainability standards has become a concern of global governance who face the challenge of achieving a balance between the use of standards for genuine sustainability objectives and not allowing them to turn into instruments of protectionism or coercion The emerging economies given their increasing engagement with the global economy are most impacted by the use of sustainability standards The emphasis of emerging economies in this book is retained both by using case studies from these economies and by collating perceptions and assessments of those located in these economies The case studies included span sectors such as palm oil forestry food quality vehicular emissions and water standards and address the problems unique to the emerging economies including capacity building for compliance with standards adapting international standards in domestic contexts and addressing the exclusion of small and medium enterprises etc Complex interfaces and dynamics of a global nature are not limited to the thematic of this book but also extend to the process through which it was written This book brings together insights from developed as well as emerging economies Germany India Mexico Brazil Indonesia Pakistan Mexico and China It also brings together scholars and practitioners to jointly ponder upon the conceptual aspects of the global frameworks for sustainability standards This book is a very useful resource for researchers and practitioners alike and provides valuable insights for policy makers as well

Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons, 2013

Systemic Crises of Global Climate Change Phoebe Godfrey, Denise Torres, 2016-04-14 Sociological literature tends to view the social categories of race class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity This limited focus is clearly inadequate Systemic Crises of Global Climate Change is an edited volume of 49 international interdisciplinary contributions addressing global climate change GCC by intentionally engaging with the issues of race gender and class through an intersectional lens The volume challenges and inspires readers to foster new theoretical and practical linkages and think beyond the traditional and oftentimes reductionist environmental science frame by examining issues within their turbulent political cultural and personal landscapes Varied media and writing styles invite students and educators to reflexively engage different yet complementary approaches to GCC analysis and interpretation mirroring the disparate voices and viewpoints within the field The second volume Emergent Possibilities for Sustainability will take a similar approach but will examine the possibilities for solutions as in the quest for global sustainability This book is a valuable resource for academics researchers and both undergraduate and post graduate students in the areas of Environmental Studies Climate Change Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC
