Principles of Clinical Medicine for Space Flight Michael R. Barratt, Ellen S. Baker, Sam L. Pool, 2020-01-02 In its first edition *Principles of Clinical Medicine for Space Flight* established itself as the authoritative reference on the contemporary knowledge base of space medicine and standards of care for space flyers. It received excellent notices and is used in the curricula of civilian and military training programs and used as a source of questions for the Aerospace Medicine Certifying Examination under the American Board of Preventive Medicine. In the intervening few years the continuous manning of the International Space Station has both strengthened existing knowledge and uncovered new and significant phenomena related to the human in space. The Second Edition incorporates this information. Gaps in the first edition will be addressed with the addition of new and revised chapters. This edition is extensively peer reviewed and represents the most up to date knowledge.

The Myth of the Poor Man's Atomic Bomb and the Politics of Proliferation Biejan Poor Toulabi, 2021-04-07 Preventing the spread of weapons of mass destruction has been an important policy priority in the past decades. This dissertation questions the prevailing view that chemical and biological weapons (CBWs) are a poor man's atomic bomb that are particularly attractive to developing countries that cannot acquire nuclear weapons. The study shows that vague unverifiable and inflated threat assessments from US government sources have played an important role in sustaining this myth. A unique dataset of CBW development programs in the period 1946-2010 demonstrates that significantly fewer countries have had CBW programs than often thought and that especially Third World countries have been incorrectly accused of pursuing or possessing CBWs.
