

510 | ICSE Last 10 Years Solved Papers

(c) Given : Principal = ₹ 15,000

We know that

$$A = P \left(1 + \frac{r}{100} \right)^n$$

$$\begin{aligned} \text{Amount after 1st year} &= 15,000 \left(1 + \frac{8}{100} \right) \\ &= ₹ 16,200 \end{aligned}$$

$$\text{Principal after repayment} = 16,200 - 6,200 = ₹ 10,000$$

$$\begin{aligned} \text{Amount outstanding at the end of second year} \\ &= 10,000 \left(1 + \frac{10}{100} \right) \\ &= ₹ 11,000 \end{aligned}$$

Question 2.

Ans.

(a) From a pack of 52 playing cards all cards whose numbers are multiples of 3 are removed. A card is now drawn at random.

What is the probability that the card drawn is :

(i) a face card (King, Jack or Queen)

(ii) an even numbered red card ?

(b) Solve the following equation :

[3]

$x - \frac{18}{x} = 6$. Give your answer correct to two significant figures.

[3]

(c) In the given figure O is the centre of the circle. Tangents at A and B meet at C. If $\angle AOC = 30^\circ$, find

(i) $\angle BCO$

(ii) $\angle AOB$

(iii) $\angle APB$

[4]

Solution :

(a) Number of cards which are multiples of 3 = 12

Cards left in the pack = 40

(i) Number of face cards = 12

$$P(\text{face card}) = \frac{12}{40} = \frac{3}{10}$$

Ans.

(ii) Even numbered red cards = 10

$$P(\text{even number red card}) = \frac{10}{40} = \frac{1}{4}$$

Ans.

(b) Let $x^2 - 6x - 18 = 0$
Compare with equation $ax^2 + bx + c = 0$, we get
 $a = 1, b = -6, c = -18$

Now,

$$\begin{aligned} x &= \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \\ &= \frac{6 \pm \sqrt{36 + 72}}{2} \end{aligned}$$

Maths Paper 1 2014 June

Carl Raymond Woodward

Maths Paper 1 2014 June:

Encyclopedia of Teacher Education Michael A. Peters, 2022-08-26 This encyclopaedia is a dynamic and living reference that student teachers teacher educators researchers and professionals in the field of education with an accent on all aspects of teacher education including teaching practice initial teacher education teacher induction teacher development professional learning teacher education policies quality assurance professional knowledge standards and organisations teacher ethics and research on teacher education among other issues The Encyclopedia is an authoritative work by a collective of leading world scholars representing different cultures and traditions the global policy convergence and counter practices relating to the teacher education profession The accent will be equally on teaching practice and practitioner knowledge skills and understanding as well as current research models and approaches to teacher education

Inspiring Primary Learners Roger McDonald, Poppy Gibson, 2021-02-25 Inspiring Primary Learners offers trainee and qualified teachers high quality case studies of outstanding practice in contemporary classrooms across the country Expert authors unravel and reveal the theory and evidence that underpins lessons helping you make connections with your own practice and understand what excellent looks like within each context and how it is achieved Illustrated throughout with interviews photos and examples of children's work it covers a range of primary subjects and key topics including creating displays outdoor learning and developing a reading for pleasure culture The voice of the practitioner is evident throughout as teachers share their own experience difficulties and solutions to ensure that children are inspired by their learning Written in two parts the first exemplifies examples of practice for each National Curriculum subject whilst the second focuses on the wider curriculum and explores issues pertinent to the primary classroom highlighting important discussions on topics such as Reading for pleasure Writing for pleasure Creating a dynamic and responsive curriculum Creating inspiring displays Outdoor learning Pedagogy for imagination Relationships and Sex Education This key text shows how even within the contested space of education practitioners can inspire their primary learners through teaching with passion and purpose for the empowerment of the children in their class For all new teachers it provides advice and ideas for effective and engaging learning experiences across the curriculum

Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing

relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike **Teaching Mathematics**

Creatively Linda Pound, Trisha Lee, 2021-09-30 This revised and updated third edition offers a range of strategies activities and ideas to bring mathematics to life in the primary classroom Taking an innovative and playful approach to maths teaching this book promotes creativity as a key element of practice and offers ideas to help your students develop knowledge understanding and enjoyment of the subject In the creative classroom mathematics becomes a tool to build confidence develop problem solving skills and motivate children The fresh approaches explored in this book include a range of activities such as storytelling music and construction elevating maths learning beyond subject knowledge itself to enable students to see mathematics in a new way Key chapters of this book explore Learning maths outdoors make more noise make more mess or work on a larger scale Everyday maths making sense of the numbers patterns shapes and measures children see around them Music and maths the role of rhythm in learning and music and pattern in maths Stimulating accessible and underpinned by the latest research and theory this is essential reading for trainee and practising teachers who wish to embed creative approaches to maths teaching in their classroom Cracking the code UNESCO, 2017-09-04 This report aims to crack the code by deciphering the factors that hinder and facilitate girls and women's participation achievement and continuation in science technology engineering and mathematics STEM education and in particular what the education sector can do to promote girls and women's interest in and engagement with STEM education and ultimately STEM careers

Creativity in the Early Years Simon Taylor, 2024-04-24 This book offers an accessible and comprehensive new introduction to the subject and practise of creativity in early years education Taylor takes a uniquely rights based and inclusive approach to creativity providing students with a holistic internationally minded overview of creativity and its place both inside and outside the classroom Sections focus on Defining creativity and its benefits Different modes of creativity Creativity in a policy and social context Creative pedagogy in practice Creative leadership Each chapter offers questions for critical reflection illustrative contemporary case studies and ample suggestions for further reading **Monthly Bulletin of Statistics** , 2014-07 **The Public and Preparatory Schools Year Book** , 1968 **The Northwestern Miller** , 1920

Critical Maths for Innovative Societies Zemira Mevarech, Bracha Kramarski, 2014 How can mathematics education foster development of the skills required by innovative societies Mathematics education is heavily emphasized worldwide but it is still considered to be a stumbling block for many students While there is near consensus that mathematics problems appropriate for the twenty first century should be complex unfamiliar and nonroutine CUN most of the textbooks still include

mainly routine problems based on the application of ready made algorithms The time has come to introduce innovative instructional methods to enhance mathematics education and students ability to solve CUN tasks Metacognitive pedagogies which explicitly train students to think about their thinking can play a key role These pedagogies can be used to improve not just academic achievement for example content knowledge and the ability to handle unfamiliar problems but also affective outcomes such as anxiety and motivation The strong relationship between metacognition and schooling outcomes has implications for both the education community and policymakers
