Recent Advances in Machines, Mechanisms, Materials and Design Rajana Suresh Kumar, Shubhashis Sanyal, P. M. Pathak, 2024-10-05 This book presents select proceedings of the 6th International and 21st National Conference on Machines and Mechanism iNaCoMM 2023 which covers the broad areas of solid mechanics and design covering the latest advancements in the fields of machines and mechanisms The topics covered in the book are categorized into four themes namely machines and mechanisms vibration and control materials and machine design and robotics This book is a useful reference for researchers and professionals working in the fields of mechanical engineering

Robotics Chao Chen, Wesley Au, Shao Liu, 2025-06-30 Robotics From Theory to Practice introduces robotic theories and technologies to audiences including university students professionals with engineering backgrounds and even high school students interested in building their own robots We aim to bridge the gap between classic theories and real world applications of robotic manipulators which to date have far exceeded the domain of conventional industry The contents are divided into three parts The first two cover classic theories of robotics including kinematics dynamics path planning control and programming Specifically Part I is an introduction targeting junior students featuring more simplistic topics and examples Part II provides the senior students and professionals with more in depth discussions on critical topics and more comprehensive examples In Part III we demonstrate how classic robotics theory can be extended to more advanced theoretical frameworks and adopted in real world applications beyond conventional industries This textbook is valuable to broad readers including those who have limited background in general engineering and wish to explore non conventional applications of robotic manipulators The scaffolded contents from Part I to Part III are created to lower the prerequisites and smooth the learning curve

CAD/CAM, Robotics and Factories of the Future Dipak Kumar Mandal, Chanan Singh Syan, 2016-01-05 This volume is based on the proceedings of the 28th International Conference on CAD CAM Robotics and Factories of the Future This book specially focuses on the positive changes made in the field of robotics CAD CAM and future outlook for emerging manufacturing units Some of the important topics discussed in the conference are product development and sustainability modeling and simulation automation robotics and handling systems supply chain management and logistics advanced manufacturing processes human aspects in engineering activities emerging scenarios in engineering education and training The contents of this set of proceedings will prove useful to both researchers and practitioners

Robotics and Mechatronics Lotfi Romdhane, Abdelfattah Mlika, Saïd Zeghloul, Abdelbadia Chaker, Med Amine Laribi, 2024-09-24 Gathering the proceedings of the 8th IFToMM International Symposium on Robotics and Mechatronics ISRM held in Djerba Tunisia on April 17 19 2024 this volume covers topics in the broad range of topics related to robotics and mechatronics such as mechanism design modeling and simulation kinematics and dynamics of multibody systems navigation and motion planning wireless sensors and wearable devices biomechanics and bio robotics micro nano robotics complex robotic systems walking machines

humanoids smart devices The proceedings extend this platform to all researchers scientists industry experts and students interested in these fields *Food Engineering Automation with Robotics and AI* Abir Chakravorty,2025-09-23 Revolutionize food manufacturing with the latest in automating technology Virtually every area of industry has been transformed by robotics and AI which have automated production and increased efficiency in myriad ways Until recently food manufacturing was an exception to the trend At present however the food manufacturing industry is in the process of a transformation which will see automation deliver the same levels of productivity and uniformity that have revolutionized other sectors of the economy *Food Engineering Automation with Robotics and AI* is a comprehensive introduction to the areas of intersection between cutting edge technologies and food manufacturing Beginning with an overview of the basic principles of food engineering the book then details applications of robotics and AI in this field along with the way automation is integrated at every stage of food production The structure of the book seamlessly blends theory and practice to maximize reader capacity to put its lessons into motion *Food Engineering Automation with Robotics and AI* readers will also find Content aligning with several UN Sustainable Development Goals including Zero Hunger Industry Innovation and Infrastructure and Responsible Consumption and Production Real world case studies throughout to show automating technologies revolutionizing food production A consistent focus on sustainable food engineering with attention to resource conservation waste reduction environmental impact mitigation and more *Food Engineering Automation with Robotics and AI* is ideal for the growing global market for food automation technologies in the coming years *Introduction to Robotics* EduGorilla Prep Experts,2024-06-05 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels
