Librarians Guide To The Web:

A Librarian's Guide to the Internet Jeanne Muller, 2003-10-31 Librarians constantly conduct searches for their customers and for themselves. However, the internet and technology are constantly changing, resulting in pressure on librarians to keep up to date with how best to use the internet. This guide offers advice on how to use the internet and how to gain the information required most effectively. It covers, for example, how to search in order to achieve the best results, strategies, what to ask, and examples and interpreting results, including examples. Importantly, not only does the book show how to use the Internet, but it also links this to perfect customer service, how to teach your customers what you know, and how to properly interpret what your customers want. Helps a librarian deliver perfect customer service with confidence. Provides practical tips and hints. Written by a highly respected and experienced practitioner.

Web-based Instruction Susan Sharpless Smith, 2006 Since publication of the first edition of *Web Based Instruction*, many significant advances in Web based instruction have occurred. New technologies and tools have emerged, different ways of accessing the Internet are available, and virtual reference trends are redefining some library users' idea of the library, and information literacy skills are recognized as essential to students' success. Expanding on the popular practical *How to Web* guide for public, academic, school, and special libraries, technology expert Smith has thoroughly updated the discussion to include new tools and trends, including browsers, access methods, hardware, and software programs. She also supplies tips to secure project funding and provides strategic information for different libraries, types including K-12, public, academic, and corporate libraries. This completely revised edition also includes a new section on learning theory applied to Web based instruction, translates Web speak, and defines the lingo with an expanded glossary and acronym list. Illustrates new procedures with fresh screen shots and URLs from top library Web programs. Addresses the limitations and benefits of Web based instruction with clear criteria for decision making. A proven winner, this thoroughly updated hands-on manual is a must-have for owners of the first edition. Librarians facing the challenge of creating a Web based project will find easy-to-understand guidance to create an educational and interactive Web site from start to finish.

The book covers all the issues affecting public library use, as well as identifying key resources in reference materials, for example, sport, travel, and history, literature, children's work, including homework, family history, community information, business information, and lifelong learning. It can be used by public librarians with little or no experience of the Internet.
