Until recently the threat of biological weapons BW has received little international attention compared with other weapons of mass destruction WMD Concern about nuclear weapons NW and more recently about chemical weapons CW has dominated efforts in non proliferation research and policy making Arguably the great moral abhorrence attached to BW has tended to narrow what public discussion has occurred on this sensitive topic Today the threat of BW is real and yet there is no means of knowing whether a country is in breach of the international ban on these horrific weapons This paper is premised on a determination to give the problem of BW proliferation the attention it deserves A mere description of the threat of BW will not suffice This work sets out to investigate an important means by which the threat to global security posed by BW could be substantially reduced the conclusion of a workable verification Protocol to strengthen the Biological Weapons Convention BWC ACDIS website *Government Reports Announcements & Index* ,1988
