Life Science P2 November 2014 Memo:

Green, Closed Loop, Circular Bio-Economy Charisios Achillas, Dionysis Bochtis, 2021-03-04 In recent years bioeconomy strategies have been implemented and adapted internationally In the bioeconomy materials are to a certain extent circular by nature However biomaterials may also be used in a rather linear way Lately a transition towards a circular economy a more restorative and regenerative economic model is being promoted worldwide A circular economy offers an alternative model aiming at doing more and better with less It is based on the idea that circulating matter and energy will diminish the need for new input Its concept lies in maintaining the value of products materials and resources for as long as possible and at the same time minimizing or even eliminating the amount of waste produced Focused on closing the loops a circular economy is a practical solution for promoting entrepreneurial sustainability economic growth environmental resilience and a better quality of life for all The most efficient way to close resource loops is to find value in the waste Different modes of resource circulation may be applied e g raw materials by products human resources logistics services waste energy or water To that end this Special Issue seeks to contribute to the circular bioeconomy agenda through enhanced scientific and multidisciplinary knowledge to boost the performance efficiency of circular business models and support decision making within the specific field The Special Issue includes innovative technical developments reviews and case studies all of which are relevant to green closed loop circular bioeconomy
