Technical Bulletin - Life Sciences and Agriculture Experiment Station Life Sciences and Agriculture Experiment Station, **The Future of the Professions** Richard Susskind, Daniel Susskind, 2022-03-31. This book predicts the decline of today's professions and introduces the people and systems that will replace them. In an internet enhanced society according to Richard Susskind and Daniel Susskind, we will neither need nor want doctors, teachers, accountants, architects, the clergy, consultants, lawyers and many others to work as they did in the 20th century. The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone, often at no or low cost and without face to face interaction. The authors challenge the grand bargain, the arrangement that grants various monopolies to today's professionals. They argue that our current professions are antiquated, opaque and no longer affordable and that the expertise of their best is enjoyed only by a few. In their place, they

propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks With a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions Illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century *International GAAP 2017* Ernst & Young LLP,2017-02-16 IFRSs the standards set by the International Accounting Standards Board IASB are complex and sometimes obscure Understanding their implications and applying them appropriately requires something special and that is why International GAAP 2017 is the essential tool for anyone applying auditing interpreting regulating studying and teaching international financial reporting It provides expert interpretation and practical guidance for busy professionals and includes in every chapter detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively The International Financial Reporting Group of Ernst an explanation of relevant principles a clear exposition of the requirements of IFRS a discussion of the implications in practice and possible alternative solutions available worked examples extracts from real company accounts a full listing of the required disclosures an important part to play in the process of promoting consistent comparable and high quality financial reporting under IFRS a book that not only provides an analysis of the requirements of the standards and the principles that they expound but also presents a unique explanation of how the standards should be interpreted and applied in practice the Chairman of Trustees of the IASC Foundation A standard reference work Financial Times The definitive guide to financial reporting The Times **Journal of the Physical Society of Japan** ,2016
