Stearns, 2020-05-27 Considering studying history at university Wondering whether a history degree will get you a good job and what you might earn Want to know what it s actually like to study history at degree level This book tells you what you need to know Studying any subject at degree level is an investment in the future that involves significant cost Now more than ever students and their parents need to weigh up the potential benefits of university courses That s where the Why Study series comes in This series of books aimed at students parents and teachers explains in practical terms the range and scope of an academic subject at university level and where it can lead in terms of careers or further study Each book sets out to enthuse the reader about its subject and answer the crucial questions that a college prospectus does not

**Why Study History?** John Fea, 2024-03-26 What is the purpose of studying history How do we reflect on contemporary life from a historical perspective and can such reflection help us better understand ourselves the world around us and the God we worship and serve Written by an accomplished historian award winning author public evangelical spokesman and respected teacher this introductory textbook shows why Christians should study history how faith is brought to bear on our understanding of the past and how studying the past can help us more effectively love God and others John Fea shows that deep historical thinking can relieve us of our narcissism cultivate humility hospitality and love and transform our lives more fully into the image of Jesus Christ The first edition of this book has been used widely in Christian colleges across the country The second edition contains updates throughout

**Why Learn History (When It's Already on Your Phone)** Sam Wineburg, 2018-09-25 Let s start with two truths about our era that are so inescapable as to have become clich s We are surrounded by more readily available information than ever before And a huge percentage of it is inaccurate Some of the bad info is well meaning but ignorant Some of it is deliberately deceptive All of it is pernicious With the internet always at our fingertips what s a teacher of history to do Sam Wineburg has answers beginning with this We definitely can t stick to the same old read the chapter answer the questions at the back snoozefest we ve subjected students to for decades If we want to educate citizens who can sift through the mass of information around them and separate fact from fake we have to explicitly work to give them the necessary critical thinking tools Historical thinking Wineburg shows us in Why Learn History When It s Already on Your Phone has nothing to do with test prep style ability to memorize facts Instead it s an orientation to the world that we can cultivate one that encourages reasoned skepticism discourages haste and counters our tendency to confirm our biases Wineburg draws on surprising discoveries from an array of research and experiments including surveys of students recent attempts to update history curricula and analyses of how historians students and even fact checkers approach online sources to paint a picture of a dangerously mine filled landscape but one that with care attention and awareness we can all learn to navigate It s easy to look around at the public consequences of historical ignorance and despair Wineburg is here to tell us it doesn t have to be that way The future of the past may rest on

our screens But its fate rests in our hands      **Learning History** Maria Rose,2015-01-06 In recent years the idea of building a learning organization has gained currency in management circles Many senior managers in particular have come to recognize that with the right approach to collective learning their enterprises can continually gain new talents and capabilities even as they weather the vicissitudes of fate Managers in middle levels meanwhile have embraced the learning organization idea because it encourages people to follow their own aspirations and in the process boost organizational performance This implies that people can reclaim a little bit of the spirit of community and personal involvement that has been leached out of conventional business decision making learn more in this book      Knowing, Teaching, and Learning History Peter N. Stearns,Peter Seixas,Sam Wineburg,2000-09 This four part volume identifies the problems and issues in late 20th and early 21st century history education working towards an understanding of this evolving field It aims to give both students and teachers insights into the best way of developing historical understanding in pupils      Learning History in America Lloyd S. Kramer,Donald Reid,William L. Barney,1994-01-01 The essays in this book like all other texts have been written in a historical context that shapes both the themes and the prose styles of the authors A close reading of these texts would in fact lead to many overlapping contexts of politics social hierarchies modern communications and international relations but we want to focus briefly on two contextual influences that carry the most obvious connections to this book the wide ranging public debate about the proper curriculum for American schools and universities and the more specific debate among historians about new trends in historical scholarship      **Studying History** Robert Vincent Daniels,1981      **Helping Your Child Learn History** Elaine Wrisley Reed,1993      **Learn History** Michael Robert Robert,2015-01-06 Lack of historical memory is parallel to this loss of individual memory The link on which we depend every day between the past and present would be lost if we had no memory of our history And we would miss a great source of enjoyment that comes from piecing together the story of our past Read to learn more      *Transforming History* Mary Jo Festle,2020-04-14 Teaching history well is not just a matter of knowing history it is a set of skills that can be developed and honed through practice In this theoretically informed but eminently practical volume Mary Jo Festle examines the recent explosion of research on the teaching and learning of history Illuminated by her own work Festle applies the concept of backward design as an organizing framework to the history classroom She provides concrete strategies for setting up an environment that is inclusive and welcoming but still challenging and engaging Instructors will improve their own conceptual understandings of teaching and learning issues as well as receive guidance on designing courses and implementing pedagogies consistent with what research tells us about how students learn The book offers practical illustrations of assignments goals questions grading rubrics unit plans and formats for peer observation that are adaptable for courses on any subject and of any size *Transforming History* is a critical guide for higher and secondary education faculty neophytes and longtime professionals alike working to improve student learning      **How to Learn History** Anna Evan Evan,2015-01-06 Imagine waking up one

morning to find out that you have no memory You are not able to remember who you are or what happened in your life yesterday or the day before that You are unable to tell your children from total strangers you cannot communicate with people because you no longer know how to greet them or understand their conversation You don t remember what the election war or the cinema mean learn some interesting facts of learning history      **Teaching History in the Era of Globalization: Epistemological and Methodological Challenges** Cosme J.
