Plan No 1 1955 LEGO bricks have gone on to become a global phenomenon and the favorite building toy of children as well as many an AFOL Adult Fan of LEGO. LEGO has also become a medium into which a wide number of media franchises including Star Wars, Harry Potter, Pirates of the Caribbean, Batman, Superman, Lord of the Rings, and others have adapted their characters, vehicles, props, and settings. The LEGO Group itself has become a multimedia empire including LEGO books, movies, television shows, video games, board games, comic books, theme parks, magazines, and even MMORPGs. LEGO Studies: Examining the Building Blocks of a Transmedial Phenomenon is the first collection to examine LEGO as both a medium into which other franchises can be adapted and a transmedial franchise of its own. Although each essay looks at a particular aspect of the LEGO phenomenon, topics such as adaptation, representation, paratexts, franchises, and interactivity intersect throughout these essays, proposing that the study of LEGO as a medium and a media empire is a rich vein barely touched upon in Media Studies.

Cityguide New York City, 2002 This book, the first of its kind, sets a new standard as a work of reference covering British and Irish art in public collections from the beginning of the sixteenth century to the end of the nineteenth. Nearly 9,000 painters are listed with almost 90,000 paintings in more than 1,700 separate collections. Within this vast coverage is another important category: those pictures that are now lost, mostly as a consequence of the Second World War or have been deaccessioned, mostly in the period from about 1950 to about 1975 when Victorian art was out of fashion. The

listing many tens of thousands of previously unpublished works including around 13 000 which do not yet have any form of attribution makes this book a unique and indispensable work of reference and one that will transform the study of British and Irish painting
