Excerpt from *Globe Manual For Use With Stand and Suspension Globes* As this is an elementary work on the globe no attempt is made at precise exactness in statement and definition for example the earth is regarded as a sphere the celestial equator a projection of the earth s equator outward against the starry dome amplitude latitude applied to the celestial sphere date line the 180th meridian etc 90 west means 90 west longitude 40 north 40 degrees north latitude The sun is spoken of as moving seeing the earth etc The earth is spoken of as moving in the direction of its noon westward in its journey around the sun Some problems and statements are true for the northern hemisphere only A technical nomenclature is purposely avoided The pamphlet is divided into Five Parts The teacher may begin with any one and follow in any order While it has been prepared for use with the suspended globe the work may be used with any globe It is an advantage for each pupil to have a small 25 or 50 cent globe An attempt has been made to be rather comprehensive in topics but brief in treatment Instead of giving the rules for the solution of problems examples are given and processes described leaving the teacher and pupils to make the rules Some repetitions occur from the fact that the pamphlet is divided into five parts The publishers will be glad to have any errors pointed out that they may be corrected in other editions While this manual was written primarily to accompany the suspension or Hanging Globes it is equally applicable to globes mounted on standards About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Excerpt from The Franklin Globe Manual An Aid to the Study of Geography and Astronomy With the Use of Artificial Globes The publishers having been frequently requested to furnish a work which should aid both the teacher and the student in the use of Artificial Globes have prepared the following pages As most of the works on the Use of the Globes are too voluminous and scientific to meet the need of many schools the present has been made as small as is consistent with a clear presentation of the subject While much that is foreign to the design though given by other authors has been excluded it is believed that all necessary information has been retained Without severe and patient study not of books alone but also of the heavens themselves none can become Astronomers Yet no one should be wholly ignorant of that system to which our earth belongs and of the simple laws which govern it Still more important is it that correct ideas in regard to the shape size and relative position of the various natural and political divisions of the earth s surface should be entertained The study of Geography with no other aid than that afforded by the Map usually results in confused impressions of relative positions for as the representations of the Earth s surface are all made upon planes the continents islands but he must pause awhile and in imagination join the two Hemispheres before he can determine its position in reference to New York And still more difficult will it be for him to gain a correct idea of the voyage from China across the Pacific to our Western shores for after following the Eastern course to the right hand edge of the Eastern Hemisphere he must apparently go backward to the left hand edge of the Map of the Western Hemisphere and then begin his easterly voyage again The Globe represents the countries oceans any imperfections that remain are intentionally left to preserve the state of such historical works **The Caxton Globe Manual** Barton S.
