

Applying the Concepts: Chapter 3

1. Attention K-Mart Shoppers

K-Mart dresses are produced in the thousands, not the dozens, so there is less incentive to share the supplies of intermediate inputs. The design and fabrication of K-Mart dresses does not require as much face time between dressmakers and the producers of intermediate goods such as buttons because (a) there is less experimentation and design innovation because K-Mart picks successful designs and produces them in mass and (b) new dresses are introduced less frequently.

2. Labor Pooling: What's Fixed and Variable?

Consider the model of labor pooling, with each firm locating either in an isolated site or in a cluster with other firms. Fill the blanks with "fixed" or "variable".

- In an isolated site, the wage is variable and the firm's workforce is fixed because the supply of labor is perfectly inelastic.
- In a cluster, the wage is fixed and the firm's workforce is variable because the supply of labor is perfectly elastic.
- See Figure 3.2.

3. Tradeoffs with Clustering for Labor Pooling

- In the left panel of Figure 3-2, the wages are \$40 and \$30, and the quantity is 50 workers. In the right panel of Figure 3-2, the wage is \$30, and the quantities are 40 and 60 workers.
- During good times, the benefit of being in the cluster as opposed to being isolated is \$250, computed as $(\$40 - \$30) \times 50 \text{ workers} = (1/2) \times (\$40 - \$30) \times 10 \text{ workers}$.
- During bad times, the cost of being in the cluster as opposed to being isolated is \$450, computed as $(\$30 - \$20) \times 40 \text{ workers} = (1/2) \times (\$30 - \$20) \times 10 \text{ workers}$.
- The benefit exceeds the cost because a firm in a cluster changes its workforce when demand changes.

4. Mr. Muller's Carnival

- In the left panel of Figure 3-2 (small city), the wages are \$6 and \$12 and the quantity is 20 workers. In the right panel of Figure 3-2 (large city) the wage is \$8, and the quantities are 10 and 30 workers.
- In the typical big city with high demand, his profit is \$135 computed as $(1/2) \times (\$18 - \$9) \times 30 \text{ workers}$.
- In the typical big city with low demand, his profit is \$15 computed as $(1/2) \times \$12 - \$9) \times 10 \text{ workers}$.
- In the typical small city with high demand, his profit is \$60 computed as $(1/2) \times \$18 - \$1) \times 20 \text{ workers}$.
- In the typical small city with low demand, his profit is \$60 computed as $(1/2) \times \$12 - \$6) \times 20 \text{ workers}$.
- In the typical small city with high demand, his profit is \$_____ computed as _____.
- In the typical small city with low demand, his profit is \$_____ computed as _____.
- His expected profit is \$75 in a big-city, compared to \$60 in a small city.

Lectures On Urban Economics Solution:

Lecture Notes In Urban Economics And Urban Policy John Yinger, 2017-12-22 Lecture Notes in Urban Economics and Urban Policy provides a wide ranging introduction to urban economics and urban policy by Professor John Yinger one of the world's leading scholars in urban economics. It draws on his extensive teaching and publication record to provide detailed lecture notes for both a PhD level course in urban economics and a master's level course in urban policy. Both the US and the world populations are becoming more and more urbanized and these notes are designed to help scholars learn and teach about the factors that determine urban residential structure and that lead to urban problems such as inadequate housing, concentrated poverty, an inequitable distribution of local public services, racial and ethnic discrimination in housing and traffic congestion. Although these notes focus on the US, many of the lessons in the notes apply to other countries as well. They also draw on Professor Yinger's extensive teaching experience and publication record in urban economics and should prove useful to many scholars who want to teach about or study urban areas.

Economic, Political and Legal Solutions to Critical Issues in Urban Education and Implications for Teacher Preparation Stephanie Thomas, Shanique J. Lee, Chance W. Lewis, 2022-06-01 The Montgomery bus boycott, Student Nonviolent Coordinating Committee (SNCC) and Brown v Board of Education reveal incentives to reform as a result of economic, political and legal threat. It is difficult to change a person's heart or to change based on moral conviction alone. However, policies and laws can be established that will change a person's behavior. Historically, there was rarely a time where societal changes were the result of a desire to do what was morally right. Doing what is right was contingent upon economic advantages, political motivation or the threat of litigation. By the mid 1900s, the NAACP had learned a valuable lesson in the South that litigation or the threat of litigation was an effective tool in the quest for educational equality. Douglas 1995. More recently, the #MeToo movement and the Los Angeles teachers' strike exposed corrupt behavior and insufficient working environments that have existed for decades. What is different? They have been exposed through political, economic and legal means. As it pertains to educating African Americans, there was an ongoing role of servitude in the political economy of the South. Anderson 1988. This was subsequently disrupted through political, economic and legal measures during Reconstruction. Racist ideologies and economic advantages were seen through Jim Crow Laws. Roback 1984 that were again disrupted through political, economic and legal methods. Education has also been cited as what perpetuates our democracy. It is institutions that afford its citizens the skills and knowledge necessary for political participation. Rury 2002. Even when legal cases are unsuccessful, such as Puitt v Commissioners of Gaston County or Plessy v Ferguson, they can forge the way to successful litigation, dismantling racist ideologies that oppress African Americans. Although the Puitt decision did not remove the processes of discrimination against Black schools, it left intact the legal basis on segregated and unequal education. Douglas 1995. As citizens, it is imperative that we participate in the political process and use our authority to mandate the changes we would like to see in urban education.

When theorizing this book the intent was to provide an interdisciplinary look at solutions to critical issues in urban education through political economic and legal avenues This book seeks to provide an interdisciplinary approach to solving the issues in education while connecting it to the effects on teacher preparation Using historical and recent examples scholars can piece together solutions that will guide others to political economic and legal action necessary to dismantle systems that have bound Black and Brown children It is our intent to offer innovative yet grounded solutions that can purposefully move the conversation about solutions to critical issues in education to political economic and legal actions
