Daniotti,Marco Gianinetto,Stefano Della Torre,2019-12-30 This open access book focuses on the development of methods interoperable and integrated ICT tools and survey techniques for optimal management of the building process The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things big data advanced manufacturing robotics 3D printing blockchain technologies and artificial intelligence The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization The book describes the contribution of the ABC Department of the Polytechnic University of Milan Politecnico di Milano to R D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process including design construction and management Informative case studies complement the theoretical discussion The book will be of interest to all stakeholders in the building process owners designers constructors and faculty managers as well as the research sector

3D Surface Reconstruction Francesco Bellocchio,N. Alberto Borghese,Stefano Ferrari,Vincenzo Piuri,2012-10-28 3D Surface Reconstruction Multi Scale Hierarchical Approaches presents methods to model 3D objects in an incremental way so as to capture more finer details at each step The configuration of the model parameters the rationale and solutions are described and discussed in detail so the reader has a strong understanding of the methodology Modeling starts from data captured by 3D digitizers and makes the process even more clear and engaging Innovative approaches based on two popular machine learning paradigms namely Radial Basis Functions and the Support Vector Machines are also introduced These paradigms are innovatively extended to a multi scale incremental structure based on a hierarchical scheme The resulting approaches allow readers to achieve high accuracy with limited computational complexity and makes the approaches appropriate for online real time operation Applications can be found in any domain in which regression is required 3D Surface Reconstruction Multi Scale Hierarchical Approaches is designed as a secondary text book or reference for advanced level students and researchers in computer science This book also targets practitioners working in computer
