S. Signal Corps (Classic Reprint)** United States Army Signal Corps,2017-05-20 Excerpt from Manual of Visual Signaling of the U S Signal Corps So it may be said that visual signals are either tran sient or permanent transient when each signal disap pears as soon as made permanent when the signal remains for a time in view as when ags are kept hoisted to be read or a symbol is retained in a certain position All systems of signals

are based upon the principle that having a certain number of elementary signals each in some way distinguishable from the other they are made to appear singly or together in all possible arrangements and combinations necessary to form other signals It may be necessary to know the number of signals that can be made with any given number of available elementary signals where the elementary signal is used only once in each display or where it may be used repeatedly up to the given number of places in the signal which it is desired to display Under these conditions the possible number of different signals may be determined from the rules for the equation of arrangements About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
