**Handbook of Quality of Life in African Societies** Irma Eloff, 2019-08-09 This handbook reflects on quality of life in societies on the continent of Africa. It provides a widely interdisciplinary text with insights on quality of life from a variety of scientific perspectives. The handbook is structured into sections covering themes of social context, culture and community, the environment and technology, health, education and family. It is aimed at scholars who are working towards sustainable development at the intersections of multiple scientific fields and it provides measures of both objective and subjective quality of life. The scholarly contributions in the text are based on original research and it spans fields of research such as cultures of positivity, wellbeing, literacy and multilingualism, digital and mobile technologies, economic growth, food and nutrition, health promotion, community development, teacher education and family life. Some chapters take a broad approach and report on research findings involving thousands and in one case millions of participants. Other chapters zoom in and illustrate the importance of specificity in quality of life studies. Collectively, the handbook illuminates the particularity of quality of life in Africa, the unique contextual challenges and the resourcefulness with which challenges are being mediated. This handbook provides empirically grounded conceptualizations about life in Africa that also encapsulate the dynamic, ingenious ways in which we as Africans enhance our quality of life.

**Religion and the COVID-19 Pandemic in Southern Africa** Fortune Sibanda, Tenson Muyambo, Ezra Chitando, 2022-02-24 This book investigates the role of religion in the context of the COVID-19 pandemic in Southern Africa. Building on a diverse range of methodologies and disciplinary approaches, the book reflects on how religion, politics and health have interfaced in Southern African contexts when faced with the sudden public health emergency caused by the pandemic. Religious actors have played a key role on the frontline throughout the pandemic, sometimes posing roadblocks to public health messaging but more often deploying their resources to help provide effective and timely responses. Drawing on case studies from African indigenous knowledge systems, Islam, Rastafari and various forms of Christianity, this book provides important reflections on the role of religion in crisis response. This book will be of interest to researchers across the fields of African Studies, Health, Politics and Religious Studies.
