Ensembles together with the virtualization flexibility, security and management capabilities provided by the zEnterprise System are key to solving the problems posed by today's IT infrastructure. The zEnterprise System consists of three components: IBM zEnterprise Central Processor Complex (CPC). The zEnterprise CPC can either be a zEnterprise 196 or a zEnterprise 114. Both zEnterprise CPCs offer z/OS, z/VSE and z/TPF operating systems as well as the ability to run many virtualized Linux servers under the z/VM operating system. IBM zEnterprise BladeCenter Extension (zBX). The zBX provides the capability to run the wide variety of applications typically found in UNIX and x86 architectures. The zBX supports select POWER7 blades running AIX and System x blades running Linux on System x and Microsoft Windows. IBM zEnterprise Unified Resource Manager. Unified Resource Manager runs in the Hardware Management Console (HMC). It provides integrated management across all elements of the zEnterprise System. This IBM Redbooks publication discusses how to plan and implement an ensemble using the zEnterprise Unified Resource Manager.
