African Handbook of Climate Change Adaptation Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20  
This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa. It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries. Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works. Climate change is a major global challenge. However some geographical regions are more severely affected than others. One of these regions is the African continent. Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts. The recently released IPCC special report Global Warming of 1.5°C outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas. The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa. Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs. Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate. It is against this background that the African Handbook of Climate Change Adaptation is being published. It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent. Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced.

**Shadow Libraries** Joe Karaganis, 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down Shadow Libraries explores the institutions that shape the provision of educational materials from the formal sector of universities and publishers to the broadly informal ones organized by faculty copy shops student unions and students themselves. It looks at the history of policy battles over access to education in the post World War II era and at the narrower versions that have played out in relation to research and textbooks from library policies to book subsidies to more recently the several open publication models that have emerged in the higher education sector. From the bottom up Shadow Libraries explores how simply students get the materials they need. It maps the ubiquitous practice of photocopying and what are in many cases the more marginal ones of buying books visiting libraries and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials from face to face student networks to Facebook groups and at the processes that lead to the consolidation of some

of those efforts into more organized archives that circulate offline and sometimes online the shadow libraries of the title If Alexandra Elbakyan's Sci Hub is the largest of these efforts to date the more characteristic part of her story is the prologue the personal struggle to participate in global scientific and educational communities and the recourse to a wide array of ad hoc strategies and networks when formal authorized means are lacking If Elbakyan's story has struck a chord it is in part because it brings this contradiction in the academic project into sharp relief universalist in principle and unequal in practice Shadow Libraries is a study of that tension in the digital era Contributors Bal zs Bod Laura Czerniewicz Mirosław Filiciak Mariana Fossatti Jorge Gimetto Eve Gray Evelin Heidel Joe Karaganis Lawrence Liang Pedro Mizukami Jhessica Reia Alek Tarkowski Annual Report South Africa.
