Linear Electric Motors S. A. Nasar, I. Boldea, 1987-01-01 Advanced Computational and Design Techniques in Applied Electromagnetic Systems S.-Y. Hahn, 2013-10-22 This symposium was concerned with advanced computational and design techniques in applied electromagnetic systems including devices and materials The scope of the proceedings cover a wide variety of topics in applied electromagnetic fields optimal design techniques and applications inverse problems advanced numerical techniques mechanism and dynamics of new actuators physics and applications of magnetic levitation electromagnetic propulsion and superconductivity modeling and applications of magnetic fluid plasma and arc discharge high frequency field computations electronic device simulations and magnetic materials **Applications of High Temperature Superconductors to Electric Power Equipment** Swarn S. Kalsi, 2011-04-18 The only one stop reference to design analysis and manufacturing concepts for power devices utilizing HTS High temperature superconductors HTS have been used for building many devices for electric grids worldwide and for large ship propulsion motors for the U S Navy And yet there has been no single source discussing theory and design issues relating to power applications of HTS until now This book provides design and analysis for various devices and includes examples of devices built over the last decade Starting with a complete overview of HTS the subsequent chapters are dedicated to specific devices cooling and thermal insulation systems rotating AC and DC machines transformers fault current limiters power cables and Maglev transport As applicable each chapter provides a history of the device principles configuration design and design challenges prototypes and manufacturing issues with each ending with a summary of the material covered The design analysis and design examples provide critical insight for readers to successfully design their own devices Original equipment manufacturer OEM designers industry and utilities users universities and defense services research groups and senior postgraduate engineering students and instructors will rely on this resource HTS technology reduces electric losses and increases the efficiency of power equipment This book by Swarn Kalsi a leading expert on the HTS subject provides a survey of the HTS technology and the design rules performance analyses and manufacturing concepts for power application related devices It compares conventional and HTS technology approaches for device design and provides significant examples of devices utilizing the HTS technology today The book is useful for a broad spectrum of professionals worldwide students teaching staff and OEM designers as well as users in industry and electric utilities Professor Dr Rolf Hellinger Research and Technologies Corporate Technology Siemens AG

Parameter Estimation and Adaptive Control for Nonlinear Servo Systems Shubo Wang, Jing Na, Xuemei Ren, 2024-01-16 *Parameter Estimation and Adaptive Control for Nonlinear Servo Systems* presents the latest advances in observer based control design focusing on adaptive control for nonlinear systems such as adaptive neural network control adaptive parameter estimation and system identification This book offers an array of new real world applications in the field Written by eminent scientists in the field of control theory this book covers the latest advances in observer based control design It

provides fundamentals algorithms and it discusses key applications in the fields of power systems robotics and mechatronics flight and automotive systems Presents a clear and concise introduction to the latest advances in parameter estimation and adaptive control with several concise applications for servo systems Covers a wide range of applications usually not found in similar books such as power systems robotics mechatronics aeronautics and industrial systems Contains worked examples which make it ideal for advanced courses as well as for researchers starting to work in the field particularly suitable for engineers wishing to enter the field quickly and efficiently
