

It's Like Pulling Teeth: A Case Study in Physiology

Phil Stephens

Part I—The Hospital

At last the day had come. Mr. Thompson was having his wisdom teeth removed. He was tired of the aches and pains and the sight of his *puffy* face in the mirror every morning. He felt helpless, lying on the *gurney* watching the ceiling lights whiz by as he was being wheeled to surgery.

Mr. Thompson had selected this particular oral surgeon because of the sign outside his practice that read: "We cater to cowards." But the surgeon still hadn't seemed to understand Mr. Thompson's fear of dental procedures; he had wanted to use a local anesthetic. Fortunately, the anesthesiologist was sympathetic to his request for a general anesthetic.

As the mask came over Mr. Thompson's face, he felt so alone. It reminded him of how he felt as a boy, in the orphanage. Then the halothane started to take effect and he went *under*.

As surgery was about to begin, Mr. Thompson started twitching. The anesthesiologist saw Mr. Thompson's heart rate increase, his muscle contractions become strong and widespread throughout his body, and the patient began to sweat profusely. As Mr. Thompson's temperature quickly increased, the anesthesiologist injected a solution into the IV drip. Then Mr. Thompson went limp and all that could be heard was the sound of oxygen rushing through the ventilator, assisting Mr. Thompson's breathing.

"Next time we do as I say and we use a local," muttered the angry surgeon as he glared at Mr. Thompson.

The Weather of the Future Heidi Cullen, 2011-07-19 Dr Heidi Cullen one of the world s foremost climatologists and environmental journalists offers a new way of viewing the climate change phenomenon not as some future event but as something happening right now in our own backyard In this groundbreaking provocative work Dr Cullen combines the latest scientific research with state of the art climate model projections to create climate change scenarios for seven of the most at risk locations around the globe From the Central Valley of California where coming droughts will jeopardize the entire state s water supply to New York City whose infrastructure is extremely vulnerable to even a relatively weak Category 3 hurricane to Greenland where warmer temperatures will give access to mineral wealth buried beneath ice sheets for millennia Cullen illustrates how if left unabated climate change will transform every corner of the world by midcentury and no two regions will be affected in quite the same way
