Language, Knowledge and Pedagogy Frances Christie, 2009-02-01 This book explores the nature of knowledge language and pedagogy from the perspective of two complementary theories systemic functional linguistics and Bernstein inspired sociology Bernstein's sociology of knowledge makes a distinction between horizontal and vertical discourses as ways in which knowledge is transmitted in institutional settings with teachers as agents of symbolic control Systemic functional linguists have explored educational discourse according to similar hierarchies and by bringing the two perspectives together this book shows the impact of language on knowledge and pedagogy The contributors examine the different structures of knowledge and the flow of information within the school context but also according to language in early childhood literacy English the social sciences science and mathematics The result is a progressive and dynamic analysis of knowledge structures at work in educational institutions Language Knowledge and Pedagogy makes a major contribution to linguistics applied linguistics and educational theory It will be of interest to researchers working in these areas

Disciplinary: Functional Linguistic and Sociological Perspectives Frances Christie, Karl Maton, 2011-02-03 Disciplinary knowledge is under threat in the modern world Claims abound that we are entering a landscape in which the division of disciplines is obsolete implying a commitment to outdated values in scholarship Notions of discipline are critiqued as reflecting social power and representing the worldview of dominant social groups By addressing and challenging such claims this edited collection argues that proclamations of the death of disciplines have been greatly overstated Not only are the notions of disciplinarity still important for understanding how we come to know the world but this volume demonstrates how significant disciplinarity is to understanding different forms of knowledge if we wish to improve the building of knowledge and educational practice Using analytical tools from systemic functional linguistics theory and social realist sociology this volume illustrates how different disciplines can collaborate and cross fertilize successfully without losing their distinctive insights and disciplinary integrity The subsequent theory developed will thereby extend both linguistic and sociological approaches to the topic and make a major contribution to educational theory

Halliday and Chinese Linguistics: The Full Circle Zhuanglin Hu, 2024-06-24 This book is a progressive exposition on Halliday's academic thought and its origins by the renowned linguist Hu Zhuanglin based on 30 years of research. The first part, Chinese Origin, introduces readers to the author's gradual understanding that Halliday's academic thought mainly came from Chinese scholars such as Wang Li, Luo Changpei, and Gao Mingkai. In the 1980s, Halliday and his students introduced the theory of Systemic Functional Linguistics into the foreign language and linguistics circles in China, thus Halliday's academic thought returned to where it originated. The second part, A Discussion of Theories, mainly addresses the author's experience and further discussions after learning Halliday's theory. The theme of the third part is Discourse Analysis and focuses on the greatest difference between Systemic Functional Linguistics and traditional grammar: sentence grammar. Halliday emphasizes that the study of discourse and sentences are only the embodiment of discourse at the next level. The fourth part, The Study of Chinese, applies Halliday's linguistic theory to the evolution of the research of the Chinese language in China, which can better explain the theme of return and is of great significance for Chinese scholars' understanding and application of Halliday's academic thought.

Women in Social Semiotics and SFL Eva Maagerø, Ruth Mulvad, Elise Seip Tønnessen, 2021-08-26 This book showcases interviews with nine women who have made pioneering contributions to social semiotics and systemic functional linguistics (SFL), highlighting how these women have taken the discipline into new and innovative directions and the enduring impact of their work. The volume features interviews with a generation of scholars inspired by the prominent linguists Michael Halliday and Ruqaiya Hasan in Sydney, reflecting on their achievements in the advancement of theory, knowledge, and practical application, as well as the establishment of research centers in different parts of the world. A consistent interview format helps to illustrate the different directions the work of these scholars has taken and their different takes on key concepts to the discipline, such as register, genre, text, and context, and multimodality. Taken together, the interviews offer insights into key strands of social semiotic and SFL scholarship and give inspiration toward moving the field into new theoretical and applied directions. Reflecting on the groundbreaking work of renowned women scholars in social semiotics and SFL and their continued global impact, this book will be key reading for students and scholars in these fields, as well as those in the areas of language pedagogy, literacy, and multimodality.

Designing Learning with Embodied Teaching Fei Victor Lim, 2020-08-27 Teaching and learning involve more than just language The teachers use of gestures the classroom spaces they occupy and the movements they make as well as the tools they use work together with language as a multimodal ensemble of meanings Embodied teaching is about applying the understandings from multimodal communication to the classroom It is about helping teachers recognise that the moves they make and the tools they use in the classroom are part of their pedagogy and contribute to the design of the students learning experience In response to the changing profile and needs of learners in this digital age pedagogic shifts are required A shift is the evolving role of teachers from authority of knowledge to designers of learning This book discusses how using examples drawn from case studies teachers can use corporeal resources and digital tools to design learning experiences for their students It advances the argument that the study of the teachers use of language gestures positioning and movement in the classroom from a multimodal perspective can be productive This book is intended for educational researchers and teacher practitioners as well as curriculum specialists and policy makers The central proposition is that as teachers develop a semiotic awareness of how their use of various meaning making resources express their unique pedagogy they can use these multimodal resources aptly and fluently to design meaningful learning experiences This book also presents a case for further research in educational semiotics to understand the embodied ways of meaning making in the pedagogic context
