encyclopedias dictionaries journals and reference histories The annotations and various indexes are models of clarity and usefulness and cross references are liberally supplied where appropriate Although cost conscious librarians will probably consider the several other excellent literary bibliographies in print such as James L Harner s Literary Research Guide Modern Language Assn of America 1989 larger academic libraries will want Marcuse s volume Jack Bales Mary Washington Coll Lib Fredericksburg Va Library Journal

Language by Edward Sapir Edward Sapir,2014-01 This is without doubt the most important book ever written on the subject of Language and Linguistics It is a basic book covering all the then known branches of the large field It is therefore must reading for anybody interested in a deep study of languages This is a book which is basic in its subject and popular enough to be of interest to the general reader The psychological and formal characteristics of speech are carefully established and after studying the historical factors that have molded it the author has devoted his last chapters to the wider bearings of linguistic science and to furnishing a clear understanding as the ever changing instruments of our emotions and mental activity This book of Mr Sapir s distinguishes itself from other general treatment of the problems of linguistics by its power to stimulate thoughts about the subject There is nothing trite or matter of fact between the covers The discussions sporing from an unusually wide acquaintance with language in all its varieties and a scholarly understanding of the principles of psychology underlying expression But more than by its learning the book impresses us by its quick insight and acute analysis A capital illustration is the treatment of the problem of classifying languages There is also a great deal that is suggestive in what the writer has said about the process in phonetic change Especially noteworthy in this connection is the emphasis he places on what he calls patterning Closely related to patterning is the discussion of drift the idea that changes in language are not random but move in a definite direction A gratifying feature not unusual in books of this class is a chapter showing the dependence of literary style on the phonetic and formal characteristics of a language

English Language Edward Sapir,2023-07-21 This book aims to give a certain perspective on the subject of language rather than to assemble facts about it It has little to say of the ultimate psychological basis of speech and gives only enough of the actual descriptive or historical facts of particular languages to illustrate principles Its main purpose is to show what I conceive language to be what is its variability in place and time and what are its relations to other fundamental human interests the problem of thought the nature of the historical process race culture art The perspective thus gained will

be useful I hope both to linguistic students and to the outside public that is half inclined to dismiss linguistic notions as the private pedantries of essentially idle minds Knowledge of the wider relations of their science is essential to professional students of language if they are to be saved from a sterile and purely technical attitude Among contemporary writers of influence on liberal thought Croce is one of the very few who have gained an understanding of the fundamental significance of language He has pointed out its close relation to the problem of art I am deeply indebted to him for this insight Quite aside from their intrinsic interest linguistic forms and historical processes have the greatest possible diagnostic value for the understanding of some of the more difficult and elusive problems in the psychology of thought and in the strange cumulative drift in the life of the human spirit that we call history or progress or evolution This value depends chiefly on the unconscious and unrationalized nature of linguistic structure I have avoided most of the technical terms and all of the technical symbols of the linguistic academy There is not a single diacritical mark in the book Where possible the discussion is based on English material It was necessary however for the scheme of the book which includes a consideration of the protean forms in which human thought has found expression to quote some exotic instances For these no apology seems necessary Owing to limitations of space I have had to leave out many ideas or principles that I should have liked to touch upon Other points have had to be barely hinted at in a sentence or flying phrase Nevertheless I trust that enough has here been brought together to serve as a stimulus for the more fundamental study of a neglected field
