Statics with MATLAB® Dan B. Marghitu, Mihai Dupac, Nels H. Madsen, 2013-06-13 Engineering mechanics involves the development of mathematical models of the physical world Statics addresses the forces acting on and in mechanical objects and systems Statics with MATLAB develops an understanding of the mechanical behavior of complex engineering structures and components using MATLAB to execute numerical calculations and to facilitate analytical calculations MATLAB is presented and introduced as a highly convenient tool to solve problems for theory and applications in statics Included are example problems to demonstrate the MATLAB syntax and to also introduce specific functions dealing with statics These explanations are reinforced through figures generated with MATLAB and the extra material available online which includes the special functions described This detailed introduction and application of MATLAB to the field of statics makes Statics with MATLAB a useful tool for instruction as well as self study highlighting the use of symbolic MATLAB for both theory and applications to find analytical and numerical solutions [Springer Handbook of Mechanical Engineering](#) Karl-Heinrich Grote, Hamid Hefazi, 2021-04-10 This resource covers all areas of interest for the practicing engineer as well as for the student at various levels and educational institutions It features the work of authors from all over the world who have contributed their expertise and support the globally working engineer in finding a solution for today's mechanical engineering problems Each subject is discussed in detail and supported by numerous figures and tables [Performance of the Jet Transport Airplane](#) Trevor M. Young, 2019-10-24 Performance of the Jet Transport Airplane Analysis Methods Flight Operations and Regulations presents a detailed and comprehensive treatment of performance analysis techniques for jet transport airplanes Uniquely the book describes key operational and regulatory procedures and constraints that directly impact the performance of commercial airliners Topics include rigid body dynamics aerodynamic fundamentals atmospheric models including standard and non standard atmospheres height scales and altimetry distance and speed measurement lift and drag and associated mathematical models jet engine performance including thrust and specific fuel consumption models takeoff and landing performance with airfield and operational constraints takeoff climb and obstacle clearance level climbing and descending flight including accelerated climb descent cruise and range including solutions by numerical integration payload range endurance and holding maneuvering flight including turning and pitching maneuvers total energy concepts trip fuel planning and estimation including regulatory fuel reserves en route operations and limitations e.g. climb speed schedules cruise ceiling ETOPS cost considerations e.g. cost index energy cost fuel tankering weight balance and trim flight envelopes and limitations including stall and buffet onset speeds V_n diagrams environmental considerations viz noise and emissions aircraft systems and airplane performance e.g. cabin pressurization de-icing and fuel and performance related regulatory requirements of the FAA Federal Aviation Administration and EASA European Aviation Safety Agency Key features Describes methods for the analysis of the performance of jet transport airplanes during all phases of flight Presents

both analytical closed form methods and numerical approaches Describes key FAA and EASA regulations that impact airplane performance Presents equations and examples in both SI Syst me International and USC United States Customary units Considers the influence of operational procedures and their impact on airplane performance Performance of the Jet Transport Airplane Analysis Methods Flight Operations and Regulations provides a comprehensive treatment of the performance of modern jet transport airplanes in an operational context It is a must have reference for aerospace engineering students applied researchers conducting performance related studies and flight operations engineers
