

### 3. Marking points

#### 3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of errors / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as \* in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

Student	Response	Marks awarded
1	green, 5	0
2	red*, 5	1
3	red*, 8	0

Example 2: Name **two** magnetic materials.

[2 marks]

Student	Response	Marks awarded
1	iron, steel, aluminium, copper	0

#### 3.2 Marking of questions requiring a list

For questions requiring a specified number of responses (maximum of 10 responses), students may provide more than the specified number of responses. In such cases, the question requires all correct answers to be given in the specified number of responses to be awarded the full mark for the question. Each error is penalised.

#### 3.3 Marking questions requiring calculation

When a question requires a specific stage of the calculation to be completed correctly, an incorrect answer is awarded no marks for that working. An incorrect answer to a calculation question may also arise from that working. If a calculation question gives correctly, the relevant marks may be awarded.

Full marks are only awarded for a correct final answer from correct working.

#### 3.4 Interpretation of 'or'

Answers using the word 'or' should be given credit only if it is clear that this is either a full correct answer.
