<title>Using JavaScript alert Box</title>
<script type="text/javascript">
1   var message1="Match your Quotes and ";
2   var message2="Beware of Little Bugs ";
3   alert("Welcome to JavaScript Programming!\n" +
4       message1 + message2);
</script>
</head>
</html>
```

EXPLANATION

- 1 The JavaScript program starts here with the <script> tag.
- 2 Two variables, message1 and message2 are assigned text strings.
- 3 The alert() method contains a string of text. Buried in the string is a backslash sequence, \n. There are a number of these sequences available in JavaScript (see Table 3.1 on page 32). The \n causes a line break in a string. The reason for using the \n escape sequence is to make the text wrap.
- 4 The alert() method is called with two arguments. The + sign concatenates the two strings and variables together. The result is shown in the alert box as shown in the next screen, the program is executed.
