Methods for data management and data privacy. Private data aggregation Thomas Hoffmann, 2014-11-20 Seminar paper from the year 2014 in the subject Computer Science Applied grade 1.0 Karlsruhe Institute of Technology KIT language English abstract Following the nuclear disaster in Fukushima in 2011 the German federal government has decided to shut down half of the existing nuclear power plants in Germany immediately and to not have any nuclear power plants at all running by 2022 To compensate the loss of energy formerly produced by these power plants many solar collectors windmills and other sources of renewable energy are being installed So instead of having a few big power plants delivering a predictable amount of energy at all time the situation will soon be a decentralized grid of less powerful energy sources whose production is dependent on the weather Also many of those solar collectors are owned by the general public and are not under the direct control of any big utility company

Cuzzocrea, 2015-09-15 As today s organizations are capturing exponentially larger amounts of data than ever now is the time  
 for organizations to rethink how they digest that data Through advanced algorithms and analytics techniques organizations  
 can harness this data discover hidden patterns and use the newly acquired knowledge to achieve competitive advantages  
 Presenting the contributions of leading experts in their respective fields Big Data Algorithms Analytics and Applications  
 bridges the gap between the vastness of Big Data and the appropriate computational methods for scientific and social  
 discovery It covers fundamental issues about Big Data including efficient algorithmic methods to process data better  
 analytical strategies to digest data and representative applications in diverse fields such as medicine science and engineering  
 The book is organized into five main sections Big Data Management considers the research issues related to the management  
 of Big Data including indexing and scalability aspects Big Data Processing addresses the problem of processing Big Data  
 across a wide range of resource intensive computational settings Big Data Stream Techniques and Algorithms explores  
 research issues regarding the management and mining of Big Data in streaming environments Big Data Privacy focuses on  
 models techniques and algorithms for preserving Big Data privacy Big Data Applications illustrates practical applications of  
 Big Data across several domains including finance multimedia tools biometrics and satellite Big Data processing Overall the  
 book reports on state of the art studies and achievements in algorithms analytics and applications of Big Data It provides  
 readers with the basis for further efforts in this challenging scientific field that will play a leading role in next generation
