

Psychology Midterm #1 Study Guide

Material covered: Chapters 1-3, 14

Chapter One: What is Psychology/History of Psychology

- **Paul Broca:** worked with a patient who suffered damage to a small part of the left side of the brain (now called Broca's area) who could no longer speak but was able to understand everything spoken to him and could communicate in gestures. Broca deduced that damage to a specific part of the brain impaired a specific mental function (mind and brain are closely linked)
- **Gall:** also thought the mind and brain were linked.
 - **Phrenology:** a theory that psychological capacities and traits were located in particular parts of the brain. The more of these capacities and traits a person had, the larger the corresponding bumps on the skull
- **Wilhelm Wundt:** considered the father of psychology, founded the first psychology lab in Germany, studied consciousness by examining structure (structuralism)
 - structuralism
- **Edward Titchener:** Wundt's student, brought psychology to the U.S. and founded the first psychology lab in the U.S., changed structuralism by focusing on identifying the basic elements (rather than the relationship between the elements of consciousness)
 - structuralism
- **William James:** functionalism, also focused on experience, influenced by Darwin
 - functionalism
- **Max Wertheimer:** focused on the study of illusions, "the whole is greater than the sum of its parts"
 - Gestalt psychology
- **Sigmund Freud:** psychoanalysis, the unconscious mind, thought the structuralists' focus on the subjective experience of world and mind was not enough, hysteria,
 - **Psychoanalytic theory:** an approach that emphasizes the importance of unconscious mental processes in shaping feelings, thoughts, and behaviors
- **Abraham Maslow:** believed behavior was determined by a person's capacity to choose not to think and act based on unique perception, pioneered humanistic psychology with Carl Rogers
 - Humanistic psychology
- **Carl Rogers:** pioneered humanistic psychology with Abraham Maslow
- **John Watson:** rejected the notion that anything is knowable about the mind, focused entirely on the study of behavior, scientific psychology, goal of scientific psychology was to predict and control behavior in ways that benefit society, should look for the "causes" of behavior in the environment, understanding behavior requires no reference to any unobservable event occurring within the individual, no fundamental differences between human and animal behavior
 - behaviorism
- **B.F. Skinner:** reinforcement, most vocal advocate of behaviorism, *Verbal Behavior*
 - Behaviorism/reinforcement
