

Read the text and answer the questions 4 and 5:

William Shakespeare (1564 – 1616) was born at Stratford-upon-Avon in a house in Henley Street. This is preserved intact. His mother, Mary Arden, was one of the daughters of Robert Arden, a yeoman farmer of Wilmore: his father, John Shakespeare, was a Glover and wool dealer of good standing who held the office of Bailiff of the Borough in 1568. From the age of seven to about 14, he attended Stratford Grammar School receiving an excellent well-rounded education. At the age of 18 Shakespeare married Anne Hathaway, who was seven years his senior and three months pregnant. She was of 'yeoman' stock – her family owned a farm one mile west of Stratford in Shottery. He endured her until he could stand it no longer and fled to London to become an actor. He then became actor-manager and part-owner in the Black friars and afterwards the Globe Theatres. Shakespeare's acting career was spent with the Lord Chamberlain's Company, where he was a first-rate actor. The company was renamed the King's Company in 1603 when James succeeded to the throne. Among the actors in the group was the famous Richard Burbage. The partnership acquired interests in two theatres in the Southward area of London, near the banks of the Thames – the Globe and the Black friars. Shakespeare returned to Stratford for his later years where he died at the age of 52 and now lies at rest in his special grave at Holy Trinity Church.

Udalova, Anna S. Vlasova, 2021-07-28 Intellectual property rights are essential for a firm s competitive edge and success and form the significant assets for many firms The authors of this book argue that intellectual property is a complex phenomenon which inevitably requires a combination of both economic and legal considerations because the lack of understanding of the mechanisms for the protection and preservation of IP can serve to undermine any of the potential economic benefits The book outlines the opportunities that can be derived from the use of IP in business and also identifies the rules necessary for their implementation It offers a comprehensive systemic research of intellectual property based on the most up to date legislation and cases of IP use in Russia Such an approach will allow readers to fully understand the peculiarities of IP as a special phenomenon of the Russian market There is a good balance between theoretical knowledge and practical implementation and the plain language and unique approach to structuring information make the book accessible and easy to understand It contains a special glossary of terms to facilitate the understanding of the material presented in the book Although the book looks specifically at the Russian case it will have international appeal since intellectual property by its very nature has become a transnational phenomenon Moreover the international regulatory

framework provides for the similarity of legal regulation of IP The book will find an audience among researchers concerned with the economics and law of intellectual property as well as policymakers and practitioners involved in business IP The Routledge Companion to Accounting and Risk Margaret Woods, Philip Linsley, 2017-03-27 To date there has been little consideration of the many different ways in which accounting and risk intersect despite organisations being more determined than ever to build resilience against potential risks This comprehensive volume overcomes this gap by providing an overview of the field drawing together current knowledge of risk in a wide range of different accounting contexts Key themes such as corporate governance trust uncertainty and climate change are covered by a global array of contributing scholars These contributions are divided into four areas The broader aspects of risk and risk management Risk in financial reporting Risk in management accounting Risk monitoring The book is supported by a series of illustrative case studies which help to bring together theory and practice With its wealth of examples and analyses this volume provides essential reading for students scholars and practitioners charged with understanding diverse facets of risk in the context of accounting in the business world *Chlorophyll Organization and Energy Transfer in Photosynthesis* Gordon Ethelbert Ward Wolstenholme, D.
