Fueling Freedom Stephen Moore, Kathleen Hartnett White, 2016-05-23 Fossil fuel energy is the lifeblood of the modern world Before the Industrial Revolution humanity depended on burning wood and candle wax But with the ability to harness the energy in oil and other fossil fuels quality of life and capacity for progress increased exponentially Thanks to incredible innovations in the energy industry fossil fuels are as promising safe and clean an energy resource as has ever existed in history Yet highly politicized climate policies are pushing a grand scale shift to unreliable impractical incredibly expensive and far less efficient energy sources Today fossil fuel has become such a dirty word that even fossil fuel companies feel compelled to apologize for their products In Fueling Freedom energy experts Stephen Moore and Kathleen Hartnett White make an unapologetic case for fossil fuels turning around progressives protestations to prove that if fossil fuel energy is supplanted by green alternatives for political reasons humanity will take a giant step backwards and the planet will be less safe less clean and less free

Is the Universe a Hologram? Adolfo Plasencia, 2017-05-04 Questions about the physical world the mind and technology in conversations that reveal a rich seam of interacting ideas Science today is more a process of collaboration than moments of individual eureka's This book recreates that kind of synergy by offering a series of interconnected dialogues with leading scientists who are asked to reflect on key questions and concepts about the physical world technology and the mind These

thinkers offer both specific observations and broader comments about the intellectual traditions that inform these questions doing so they reveal a rich seam of interacting ideas The persistent paradox of our era is that in a world of unprecedented access to information many of the most important questions remain unsolved These conversations conducted by a veteran science writer Adolfo Plasencia reflect this with scientists addressing such issues as intelligence consciousness global warming energy technology matter the possibility of another earth changing the past and even the philosophical curveball is the universe a hologram The dialogues discuss such fascinating aspects of the physical world as the function of the quantum bit the primordial cosmology of the universe and the wisdom of hewn stones They offer optimistic but reasoned views of technology considering convergence culture algorithms Beauty Truth the hacker ethic AI and other topics And they offer perspectives from a range of disciplines on intelligence discussing subjects that include the neurophysiology of the brain affective computing collaborative innovation and the wisdom of crowds Conversations with Hal Abelson Ricardo Baeza Yates John Perry Barlow Javier Benedicto Jos Bernab u Michail Bletsas Jose M Carmena David Casacuberta Yung Ho Chang Ignacio Cirac Gianluigi Colalucci Avelino Corma Bernardo Cuenca Grau Javier Echeverria Jos Hernandez Orallo Hiroshi Ishii Pablo Jarillo Herrero Henry Jenkins Anne Margulies Mario J Molina Tim O Reilly John Ochsendorf Paul Osterman Alvaro Pascual Leone Rosalind W Picard Howard Rheingold Alejandro W Rodriguez Israel Ruiz Sara Seager Richard Stallman Antonio Torralba Bebo White Jos Mar a Yturralde
