*Sustainability Impact Assessment of Land Use Changes* Katharina Helming, Marta Pérez-Soba, Paul Tabbush, 2008-06-11 There are many reasons why strategic intelligence is required to support policy decisions These primarily stem from the nature of today s knowledge society with two contrasting trends On the one hand there is a trend of increasing human intelligence in the economic social and political systems On the other hand there is a trend towards dissolving certainties about the problems and solutions of today s society Clearly more information does not necessarily imply more certainties on how to act What is more the same facts are often interpreted in markedly different ways the same policy relevant information can and often does result in conflicting framing of a problem by different stakeholders This is mainly due to competing assumptions rather than because of inconsistent facts Therefore it is not surprising that policy makers are calling for strategic intelligence to support their understanding of today s challenges including the relevant aspects of science and

technology their impact and their possible future developments Over the last 15 years Europe has rapidly adopted the practice of dev oping and using Impact Assessment IA tools to support decision making Formal procedures and guidance for IA are well established within the European Commission and in most EU Member States The adoption of IA procedures alone however does not guarantee that every policy domain is actually using the full potential of these assessment tools in the preparation of policies and legislation
