**High Performance Computing in Science and Engineering'15** Wolfgang E. Nagel, Dietmar H. Kröner, Michael M. Resch, 2016-02-05 This book presents the state of the art in supercomputer simulation. It includes the latest findings from leading researchers using systems from the High Performance Computing Center Stuttgart HLRS in 2015. The reports cover all fields of computational science and engineering ranging from CFD to computational physics and from chemistry to computer science with a special emphasis on industrially relevant applications. Presenting findings of one of Europe's leading systems, this volume covers a wide variety of applications that deliver a high level of sustained performance. The book covers the main methods in high performance computing. Its outstanding results in achieving the best performance for production codes are of particular interest for both scientists and engineers. The book comes with a wealth of color illustrations and tables of results. Innovative Approaches to Socioscientific Issues and Sustainability Education Ying-Shao Hsu, Russell Tytler, Peta J. White, 2022-08-01 This book explores innovative approaches to teacher professional learning, examples of teaching enacted in classrooms, and factors affecting the promotion of quality teaching in socio-scientific issues and sustainability contexts. Since educational settings and cultures influence teaching, the different approaches and perspectives in various cross-national contexts enable us to appreciate the diversity of different countries' practices and provide insight into seminal approaches to socio-scientific issues based on teaching internationally. The book consists of three parts: innovative professional development programs, innovative teaching approaches, and issues relating to student engagement with socio-scientific issues and sustainability education. The book targets those who can be expected to develop curriculum, enact teaching practices, and facilitate teachers' professional development in socio-scientific issues and sustainability education.

Advances in Geoengineering, Geotechnologies, and Geoenvironment for Earth Systems and Sustainable Georesources Management Helder I. Chaminé, José Augusto Fernandes, 2023-05-27 This book comprises the peer-reviewed proceedings of the 1st Conference on Georesources, Geomaterials, Geotechnologies, and Geoenvironment (4GEO Porto, Portugal) on November 7-8, 2019. The book interests all researchers, practitioners, and students in engineering, geosciences, geotechnics, georesources, materials engineering, and earth and environmental sciences. Georesources, geomaterials, geotechnologies, and geoenvironment are very topical subjects and therefore deserve a deeper reflection by academia, practitioners, and society. That approach is vital to a correct sustainable resource management and an engineering design with nature within a geoethical framework. Georesources understood as geological, hydrological, and energetic resources are greatly important to society. Minerals, rocks, and water are resources that over time have assumed an important role in the technological development of communities. Given the increase in population and the increasing needs and intensification of their use, it is

very important to ensure their sustainable management Geomaterials are functional geological materials artificially processed for the generality of the activities developed by societies The functional geomaterials may include rock clay granular materials treated soils and industrial waste Geotechnologies are a very important tool for decision making supporting the collection mapping processing and analysis of data with geographical information systems and other geo techniques used in the most diverse fields including to support the monitoring and prediction of geohazards The geoenvironment is a transversal field that identifies continuous earth changes and to find solutions to the resulting socioeconomic and environmental changes Climate change industrialization and anthropic activity are among others factors of pressure and alteration of the natural environment so minimizing impacts and emerging hazards and risks Main topics include 1 Geomaterials Geotechnics and Georesources2 Geotechnologies Engineering Geosciences and Geohazards3 Geoenvironment Water and Climate Change      **Futsal Research and Challenges for Sport Development** Cesar Méndez-Domínguez,Fábio Yuzo Nakamura,Bruno Travassos,2022-04-06      **Exchanges** ,2005      Annales de chimie--science des matériaux ,1996      **Kinh tế và dự báo** ,2021-07
