Readers' Guide to Periodical Literature Anna Lorraine Guthrie,1915 An author subject index to selected general interest periodicals of reference value in libraries *Information Bulletin* ILLINET/OCLC Service,1996 **The Handbook of Contraception** Donna Shoupe,2007-11-07 I opened my series editor manuscript of The Handbook of Contraception A Guide for Practical Management edited by Drs Donna Shoupe and Siri Kjos on a tiny plane on the way to giving a lecture in Albany NY I expected to peruse the manuscript and found that I could not put it down The Handbook of Contraception A Guide for Practical Management is an incredibly informative and enjoyable read In keeping with the objective of this series for primary care clinicians there is a quality in this title that is uncommon among medical textbooks The chapters of this book are written with extraordinary intelligence and understanding and with attention to practical considerations in the selection and management of contraceptive options The authors have reviewed the science behind contraception including the chemical structure and effects of hormonal contraception physiology of contraception efficacy rates and side effects as well as the practical considerations that are relevant in helping patients choose between different contraceptive options They do this with a clarity of language and intent that lets the book cover with sufficient detail the full range of questions that any primary care clinician will have regarding any of the traditional or new contraceptive options Also included in each chapter is a section on counseling tips which explicitly answers many of the questions that clinicians and their patients often have when discussing contraceptive options For a book so useful and well done the editors and authors deserve our thanks **Handbook of Biosensors and Electronic Noses** Erika Kress-Rogers,2024-11-01 In developing the electronic nose and biosensor devices researchers not only copy biochemical pathways but also use nature's approach to signal interpretation as a blueprint for man made sensing systems Commercial biosensors have demonstrated their benefits and practical applications providing high sensitivity and selectivity combined with a significant reduction in sample preparation assay time and the use of expensive reagents The Handbook of Biosensors and Electronic Noses discusses design and optimization for the multitude of practical uses of these devices including *The Official Railway Guide* ,1874 **Resources in Education** ,1981 *Scientific and Technical Aerospace Reports* ,1983 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Guide to Microforms in Print** ,1984 **Readers' Guide to Periodical Literature** ,1905 **Technical Reports Awareness Circular : TRAC.** ,1987-06 *Handbook of Drug Interactions* Ashraf Mozayani,Lionel Raymon,2011-09-18 Adverse drug reactions and interactions are still a major headache for healthcare professionals around the world The US Food and Drug Administration's database recorded almost 300 000 serious adverse events in 2009 alone of which 45 000 instances proved fatal This updated new edition of the indispensable guide to drug interactions incorporates fresh research completed since the book's original publication by Humana Press in 2004 Additions include a new section on

pharmacogenomics a rapidly growing field that explores the genetic basis for the variability of responses to drugs This new material reviews important polymorphisms in drug metabolizing enzymes and applies the findings to forensic interpretation using case studies involving opiates as exemplars Existing chapters from the first edition have in most cases been updated and reworked to reflect new data or incorporate better tables and diagrams as well as to include recent drugs and formulations Recent references have been inserted too The handbook features extra material on illicit drug use with a new chapter tackling the subject that covers cocaine amphetamines and cannabis among others The section on the central nervous system also deals with a number of drugs that are abused illicitly such as benzodiazepines opiates flunitrazepam and GHB while so called social drugs such as alcohol and nicotine are still discussed in the book s section on environmental and social pharmacology Focusing as before on detailed explanation and incorporating both pharmacokinetic and pharmacodynamic drug interactions this book will continue to be a lodestar for health and forensic professionals as well as students
