Educational Psychology Angela M. O'Donnell, Eva Dobozy, Michael C. Nagel, Brendan Bartlett, Simone Smala, Catherine Wormald, Gregory Yates, 2024-12-31 O'Donnell et al's *Educational Psychology* provides pre-service teachers with a comprehensive framework for implementing effective teaching strategies aimed at enhancing students' learning development and potential. Through a meticulous examination of relevant psychological theories supplemented by contemporary local case studies and detailed analysis of lesson plans, the text offers a nuanced understanding of educational psychology without resorting to specialised terminology. Central to the text is a reflective practice framework equipping readers with the essential skills to bridge theoretical concepts with real-world classroom scenarios. Emphasising critical thinking and reflective practice, the text underscores their significance in fostering sustained professional growth and success. By integrating reflective practice into the fabric of the narrative, utilising real classroom examples, *Educational Psychology* cultivates a deep-seated understanding of the practical applications of psychological principles in educational contexts.

Developing Writers Across the Primary and Secondary Years Honglin Chen, Debra Myhill, Helen Lewis, 2020-03-09 Writing development and pedagogy is a high priority area, particularly with standardised testing showing declines in writing across time and through the years of schooling. However, to date, there are relatively few texts for teachers and teacher educators which detail how best to enable the children to become confident, autonomous and agentic writers of the future. *Developing Writers Across the Primary and Secondary Years* provides cumulative insights into how writing develops and how it can be taught across years of compulsory schooling. This edited collection is a timely and original contribution addressing a significant literacy need for teachers of writing across three key stages of writing development covering early 4-7 years old, primary 7-12 years old and secondary years 12-16 years old in Anglophone countries. Each section addresses two broader themes: becoming a writer with a child-oriented focus and writing pedagogy with a teacher-oriented focus. Together, the book brings to bear rigorous research and deep professional understanding of the writing classroom. It offers a novel approach to conceiving of writing development as a dynamic and multidimensional concept. Such an integrated interdisciplinary understanding enables pedagogical thinking and development to address more holistically the complex act of writing.
