### MY OJT NARRATIVE REPORT

On-the-job training, sometimes called direct instruction, is one of the earliest forms of training (observational learning is probably the earliest). It is a one-on-one training located at the job site, where someone who knows how to do a task shows another how to perform it. In antiquity, the kind of work that people did was mainly unskilled or semiskilled work that did not require specialized knowledge. Parents or other community members, who knew how to do a job necessary for survival, passed their knowledge on to the children through direct instruction.

Before the start of first semester for the school year 2013-2014, my classmate and I start to look for an accounting firm for our OJT. We submitted resumes in several banks and accounting firms. The next day, one of the accounting firm (QML Bookkeeping and Management Services), texted us to come to their office for an interview. They accepted us as their trainees and orient us about their policies in the office.

After that I came back to the office. My superior, Mrs. Pilar Lampa, orient me for the duties that I have to do like updating clients accounting books and answering telephone calls and how I will going to approach and entertain the clients. I have learned to be very patient and polite in answering phone calls and the right entries in journalizing.

On the first week of my training, I made few mistakes because I am still confuse on how I will going to do some of my duties like what documents do I have to put in clients folder for the managements records and what documents do I have to make for the clients copy. I learned that before doing my assigned duties I have to make sure that I understand my superior's instructions to avoid mistakes, confusion and always coming back and forth to ask for the right things to do.

From that training I learned several office works like filling of the right documents on its respective folder, filling of clients documents that are necessary in making their financial statements, encoding for clients purchases, expenses and sales which is also the basis in computing their tax and updating client's books. I realized that doing actual works are much easier than analyzing a problem on a textbook.

I also learned how to fill up BIR forms and computing the clients' taxes for the month. I gain
