2023/2024

Question 1

Which of the following statements best describe efficacy?

- It is an estimate of the benefit of treatment under ideal conditions
- It is an estimate of the reduction of disease in treated groups

Question 2

A study is conducted for a pharmaceutical agent that has shown promise for reducing heart disease among women. In order to more fully test the agent, an additional study is done restricting the participants to be randomized to those who have a history of hypertension. Which of the following advantages cannot be claimed by the researchers?

- The generalizability of the study is increased

Question 3

What is the main advantage of the randomization of the 168 study participants to one of the two drug treatment groups?

- Reduces the potential for selection bias in allocation of treatment group

Question 4

After entry into the study, patients were first classified into three groups, those who had a previous AMI, those with a first AMI who were at high risk for other cardiovascular diseases such as congestive heart failure, & those with a first AMI who were at low risk for other cardiovascular diseases. Which term best describes the study design?

- Randomized clinical trial with stratified randomization

Question 5

After assignment to treatment group, 77% of those in the placebo group were men, while 80% of those in the drug X group were men. Which statement is most likely to be true?

- Randomization was successful since the investigators did not alter the selection of participants in either group in order to ensure equal percentages of men
