context of an initial psychiatric evaluation review of psychiatric symptoms trauma history and treatment history substance use assessment assessment of suicide risk assessment for risk of aggressive behaviors assessment of cultural factors assessment of medical health quantitative assessment involvement of the patient in treatment decision making and documentation of the psychiatric evaluation Each guideline recommends or suggests topics to include during an initial psychiatric evaluation Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions In addition to reviewing the available evidence on psychiatry evaluation each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care
