**The British Palaeolithic** Paul Pettitt, Mark White, 2012 The British Palaeolithic provides the first academic synthesis of the entire British Palaeolithic from the earliest occupation to the end of the Ice Age It fills a major gap in teaching resources as well in research by providing a current synthesis of the latest research on the period *The History of British Mammals* Derek Yalden, 2010-01-31 As ice retreated from Britain 15 000 years ago a host of large mammals including reindeer wild horses woolly mammoths moose wolves brown bears lynxes and wolverines established itself in Britain The largest surviving wild land mammal today the red deer the largest contemporary land carnivore the badger and another 65 or so extant wild mammals included about a quarter of the wild mammals that have been introduced in the last 15 000 years The contemporary fauna however is largely dominated by domestic animals such as cattle sheep pigs and humans This book explores the fate of the large extinct species as well as how why and when the introduced species appeared *Geological Highlights of the West Country* W. A. MacFadyen, A. W. G. Kingsbury, 1970 **Owls, Caves and Fossils** Peter Andrews, 1990-08-30 Owls Caves and Fossils is the first comprehensive fully illustrated account of small mammal taphonomy The study of small mammal remains has previously been neglected in favor of such large mammals as elephants bovids and carnivores and Andrews remedies this deficiency by analyzing the taphonomic processes significant in the preservation of small mammal fauna in caves **Caves and Caving** , 1937-06 **Quaternary of South-West England** S. Campbell, C.O. Hunt, James D. Scourse, D.H. Keen, N. Stephens, 2012-12-06 STRUCTURE OF THE VOLUME AND TERMINOLOGY USED This book contains scientific descriptions of 63 localities Figure A of at least national importance for Quaternary geology geomorphology and environmental change in South West England These sites were selected by the Geological Conservation Review and are accordingly designated GCR sites Chapter 1 provides an introduction to the Quaternary Chapter 2 synthesizes the geomorphological development and Quaternary history of the region and outlines the principles involved in site selection The individual GCR site descriptions form the core of the book In the following chapters sites are arranged and described in broad geographic areas and by research topic This is necessitated by the widely disparate nature of the field evidence in South West England sites demonstrating the full range of Quaternary and geomorphological features are not evenly and conveniently dispersed throughout the region and some areas have significant gaps Neither do the individual

chapters contain sites that necessarily equate with particular site selection networks. Rather the chosen chapter headings provide the least repetitive means of describing the sites and background material. Where possible a chronological approach from oldest to youngest has been used to describe sites within a given chapter. Again this approach is not always possible and a group of sites may show variations on landform or Stratigraphic evidence broadly within one major time interval or chronostratigraphic stage inevitably there are many overlaps.

Study of changes in climate landscape and biota over the last million years provides the environmental backdrop to understanding human presence and absence together with the development of new technologies. This book brings together the multidisciplinary work of the project. The chapters present the results of new fieldwork and research on old sites from museum collections using an array of new analytical techniques. Features an up to date treatment of the record of human presence in the British Isles during the Palaeolithic period 700 000-10 000 years before present. Takes multidisciplinary approach that includes archaeology geochemistry geochronology stratigraphy and sedimentology. Coincides with the culmination of the AHOB project in 2010 providing a benchmark statement on the record of human occupation in Britain that can be utilized and tested by future research.

*A Guide to Speleological Literature of the English Language* Diana E. Northup, 1998 This is a family story of America's most famous cave explorer who was trapped and died in Sand Cave in 1925. That story has been told many times but never before has the complete life of Floyd Collins been presented. Floyd's younger brother Homer tells how Floyd was fascinated with caves from his childhood of his discovery of the famous Crystal Cave on the home property and of the rescue attempts from the viewpoint of a brother so devoted that his extraordinary efforts to save Floyd were rewarded by his being removed from the premises while others inexperienced in working in caves carried on the unsuccessful attempt. It is a warm story of a man whose love in life was exploring caves a man who endured his grim death with dignity and pride in his vocation. Page 4 of cover.
