Global Economic Prospects, June 2015 The World Bank,2015-06-22 Global growth is expected to be 2.8 percent in 2015 but is expected to pick up to 3.2 percent in 2016. Growth in developing countries and some high income countries is set to disappoint again this year. The prospect of rising borrowing costs will compound the challenges many developing countries are facing as they adapt to an era of low commodity prices. Risks to this outlook remain tilted to the downside. This edition of Global Economic Prospects includes two Special Features that analyze the policy challenges raised by the two transitions in developing countries: the risks associated with the first U.S. central bank interest rate increase since 2006 and the implications of persistently low commodity prices for low income countries. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects with a special focus on developing countries on a semiannual basis in January and June. The January edition includes in depth analyses of topical policy challenges faced by developing countries while the June edition contains shorter analytical pieces.

Financialisation in the European Periphery Ana Cordeiro Santos,Nuno Teles,2020-09-03 In many European countries the process of financialisation has been exacerbated by the project of closer EU integration and accelerated as a result of austerity policies introduced after the Euro crisis of 2010-2012. However the impact has been felt differently in core and peripheral countries. This book examines the case of Portugal and in particular the impact on its economy work and social reproduction. The book examines the recent evolution of the Portuguese economy of particular sectors and systems of social provision including finance housing and water labour relations and income distribution. In doing so it offers a comprehensive critical analysis of varied aspects of capital accumulation and social reproduction in the country which are crucial to understand the effects of the official bail out of 2011 and associated austerity adjustment program. The book shows how these have increasingly relied on deteriorating pay and working conditions and households direct and indirect engagement with the global financial system in new domains of social reproduction. Through its exploration of the Portuguese case the book presents a general theoretical and methodological framework for the analysis of financialisation processes in peripheral countries. This text is essential reading for students and scholars of political economy development geography international relations and sociology with an interest in examining the uneven mechanisms and impacts of global finance.

Memorandum - Dept. of Economics, University of Gothenburg ,1976 **Retooling Development Aid in the 21st Century** Shahrokh Fardoust,Stefan G. Koeberle,Moritz Piatti-Fünfkirchen,Lodewijk Smets,Mark Sundberg,2023-03-27 Instruments need to adjust to new challenges and priorities. Global pandemics climate change increased inequality low economic growth and conflict have made it increasingly difficult for developing countries to achieve the Sustainable Development Goals. Retooling Development Aid in the 21st Century: The Importance of Budget Support examines the critical

role of budget support by both multilateral and bilateral aid agencies to address the 21st century's development goals of eliminating poverty and protecting our global commons. Timely and smartly designed budget support remains a powerful tool to help address the new reality developing countries face providing fast disbursing finance in support of critical reforms. Set against the background of a dramatically changing international financial architecture the volume examines how budget support has evolved from its controversial past addresses the evidence on performance and debates over conditionality and it reflects on unmet expectations from the 2005 Paris Declaration. With the global financial crisis the Covid pandemic and the spillovers from conflict and climate change budget support re-emerged as a key financing instrument to support policy reforms and catalyze private capital. Drawing on the lessons of the last two decades the volume proposes a retooling of budget support as a versatile instrument to address both essential global public goods and tackle country specific development challenges.

Survey of Economic and Social Developments in the Arab Region 2015-2016 United Nations Publications, 2017-01-04 Trends can be noted for the past five years and with this in mind the 2015/16 Survey will utilize recent data in order to take stock of the impact of instability and conflict and address the foregone growth and output and destructive effects of this period.

Economic Survey, 2020 The State of African Cities, 2014 United Nations Human Settlements Programme, 2013 Nairobi UN Habitat c2014 9789211325980 *Dynamic Industrial Policy in Africa* United Nations. Economic Commission for Africa, 2014 For millions of Africans growth is yet to translate into jobs and better living conditions Africa's largely commodity driven growth has not been matched by the much needed structural change that can lead to economic transformation employment and reduced poverty. Market failures necessitate industrial policy interventions. Yet in the absence of the right processes and institutions good industrial policies will fail. Indeed weak institutions and poor policy design have hindered industrial policy. This report gives a framework for getting the policy process right to foster industrialization. It uses 11 country case studies to assess the critical ingredients for spurring industrialization innovative institutions effective processes and flexible mechanisms and structural transformation.

Middle Class, 2014 The present report studies the Arab middle class an important social group that is relatively little understood despite the fundamental role it has played in shaping the economic and social development outcomes in the Arab region. This report contributes to the ongoing debate about factors that led to the Arab uprisings and the difficult transitions

to democracy that followed the departure of long standing dictators by marking elements influencing middle class allegiances specifically those that weakened their well established alliances with ruling regimes The report is motivated by the conviction on the basis of past development experiences that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition Studying the middle class is therefore crucial to interpreting the past understanding the present and reading the potential future development prospects of the Arab region This report introduces three novel approaches aimed at charting a path for sustaining empowering and enlarging the middle class The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure The second relates to the profiling of the Arab middle class using variables such as education employment and mobility in addition to multidimensional poverty The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental State Publisher s description
